

TMS Collections

**OPTIMIZING COLLECTIONS
MANAGEMENT FOR MUSEUMS
AND CULTURAL INSTITUTIONS**

Discover TMS Collections, the **world's leading collections management system** for museums, and cultural institutions. This powerful, web-based solution is designed to streamline every aspect of collections management—from acquisition and cataloguing to conservation and digital asset management.

WHY CHOOSE TMS COLLECTIONS?

TMS Collections

TMS Collections empowers over 1,000+ organizations to optimize their operations, enhance collaboration, and maximize the value of their collections.

Browser-Based & Flexible Deployment

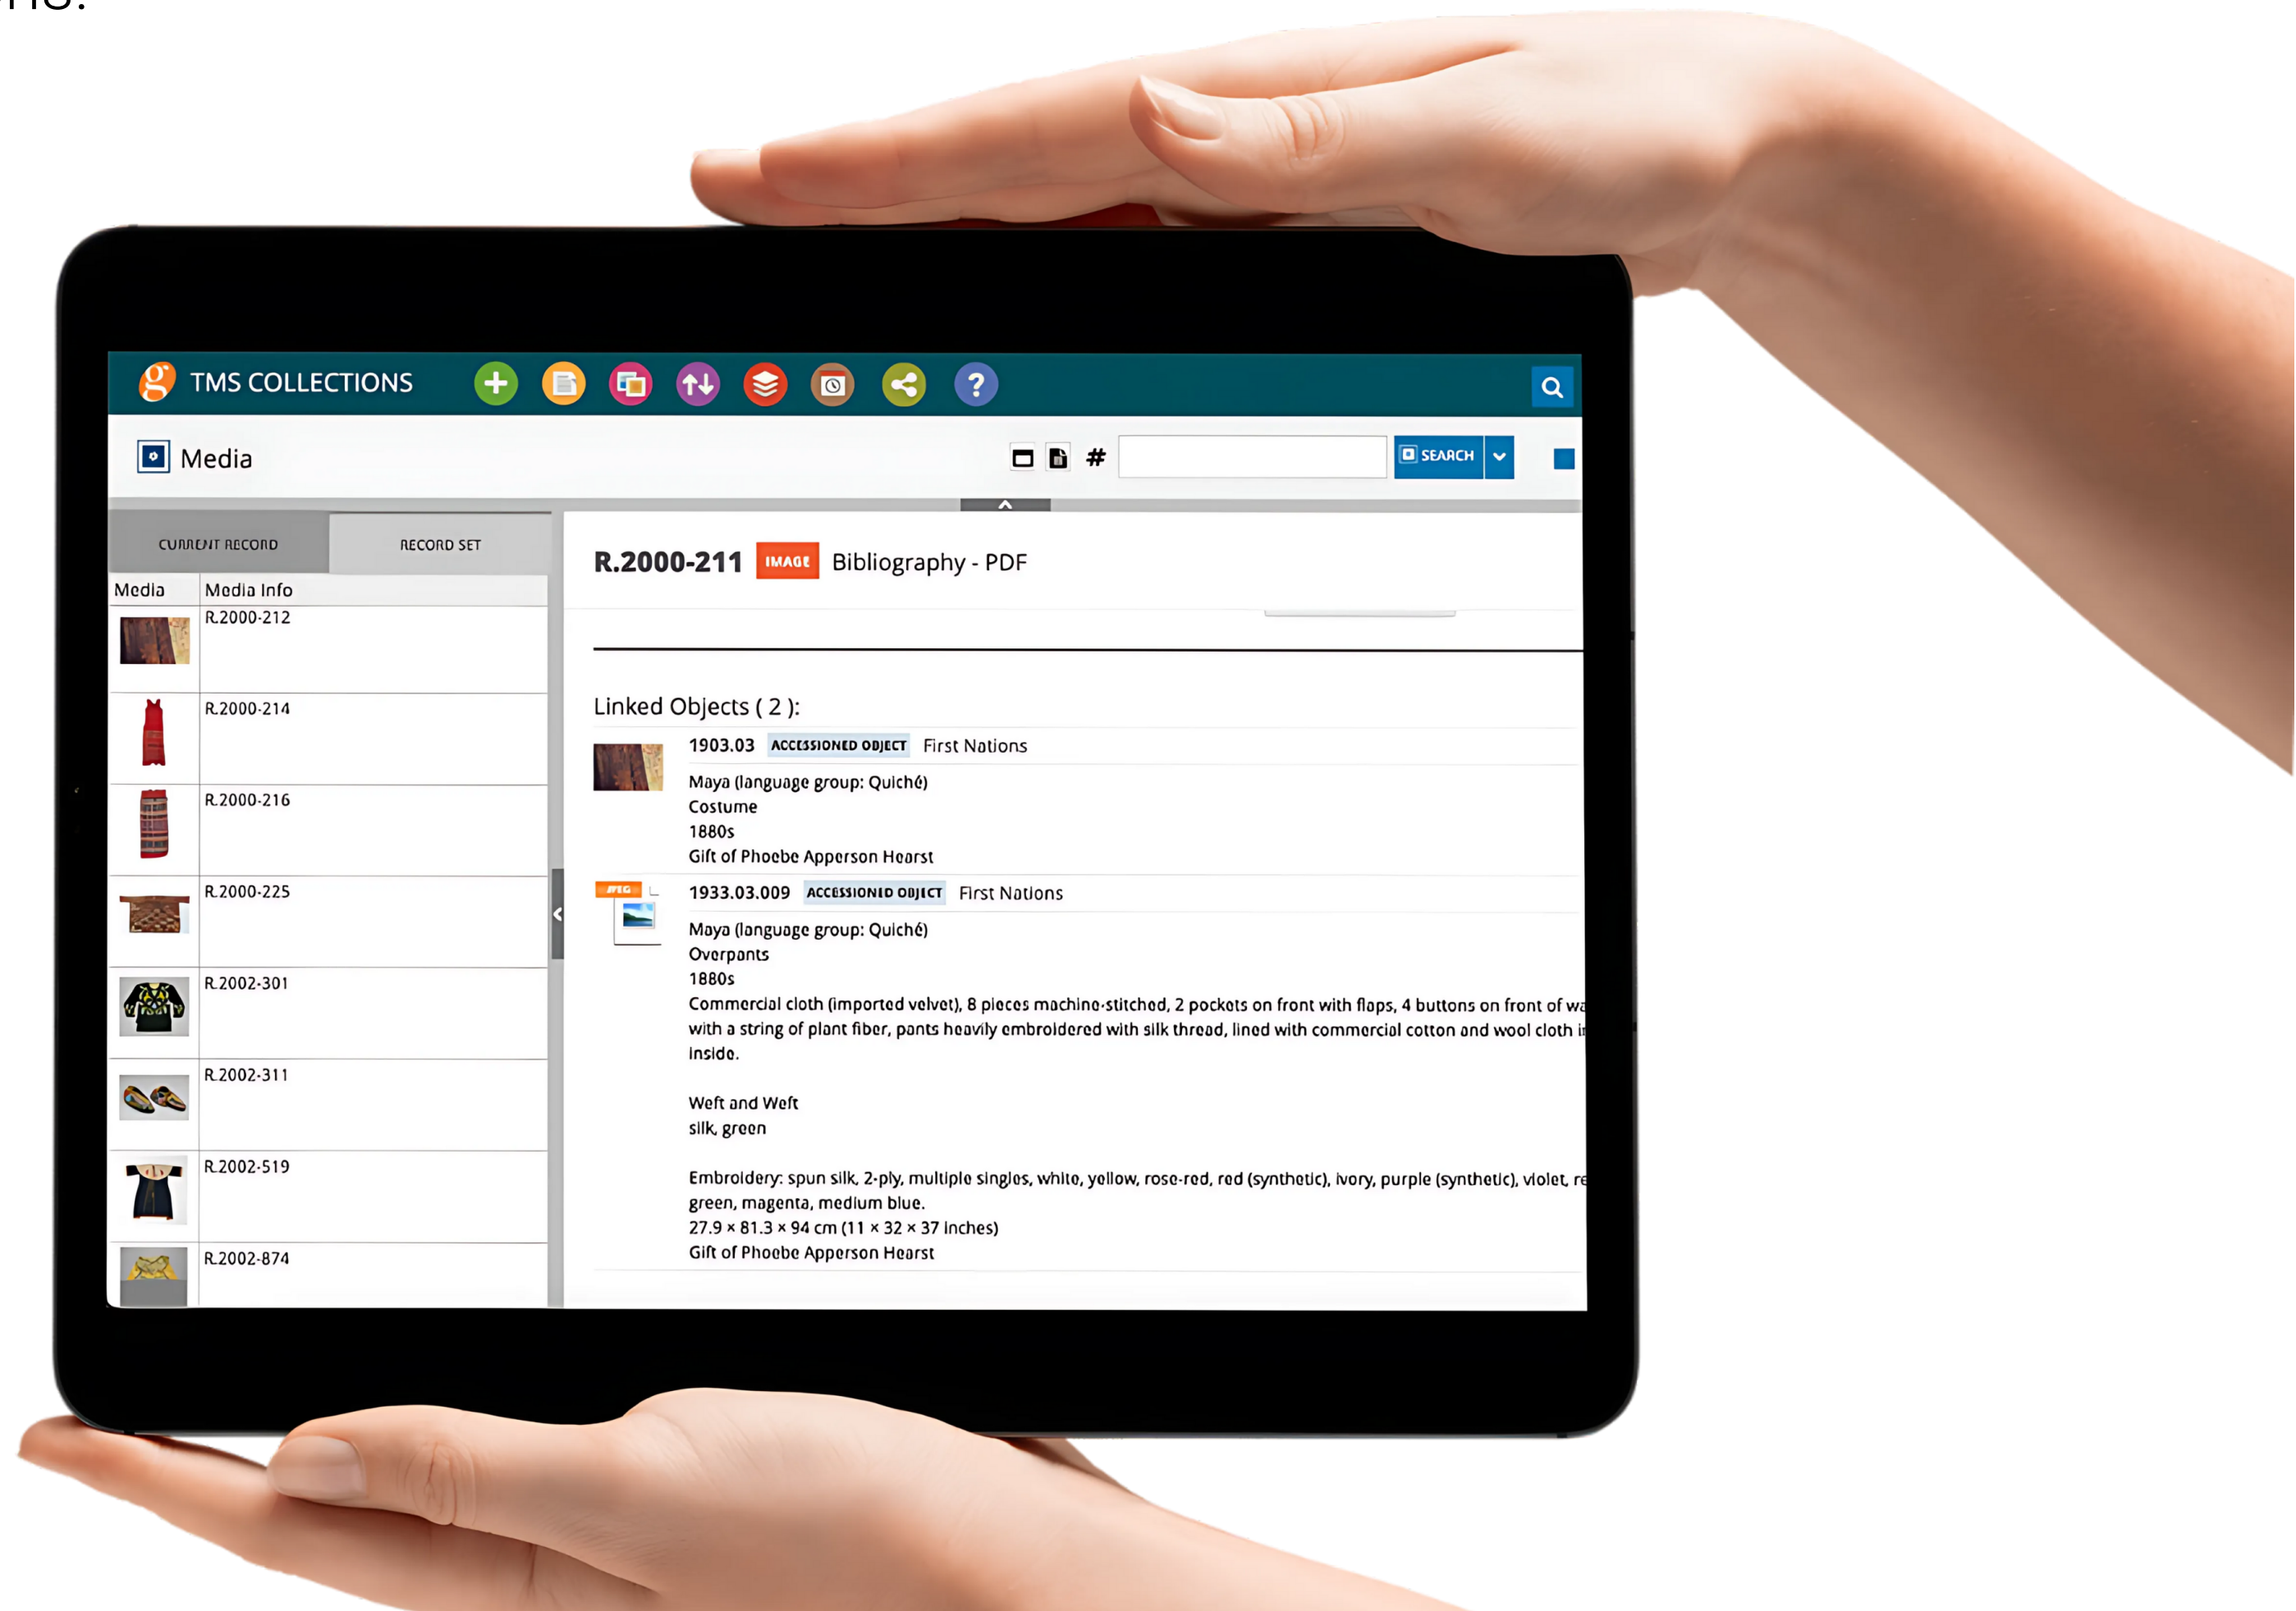

Access your collections securely from anywhere, whether hosted in the cloud or deployed on-premise, with no additional infrastructure needed.

Highly Customizable & Configurable

Tailor TMS Collections to fit your needs by adjusting fields, workflows, and user permissions for full control over the system.

Impressive Search Capabilities

Easily find records with powerful search features, including term searches and customizable filters, to navigate large datasets quickly.

Powerful Thesaurus Manager

Ensure consistent terminology in cataloguing with a robust thesaurus manager, improving data quality and communication.

Personalized Dashboards

Customize dashboards to display only the records you need, improving productivity by streamlining access to important information.

Preconfigured & Customizable Reports

Use preconfigured reports or request tailored reports to meet your institution's unique needs and workflows.

Multilingual Interface

Support your global team with TMS Collections' multilingual interface, making it easy for diverse users to navigate the system.

Seamless Data Import & Export

Simplify cataloguing and information exchange with seamless data import/export, enabling easy integration with other systems.

24/7 Secure Access on Any Device

Access TMS Collections securely from any device, including desktop and tablet, for reliable, on-the-go collection management.

ENHANCE EFFICIENCY WITH THE MODULES IN TMS COLLECTIONS

TMS Collections

TMS Collections offers a comprehensive suite of 11 modules, each designed to streamline your workflow and enhance your collection management. Whether you're cataloguing objects, managing exhibitions, or handling loans, our modules provide powerful features to meet the specific needs of your institution.

SUPERIOR OBJECT MANAGEMENT

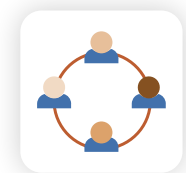

Objects: Capture detailed cataloguing information, including accessioning, dimensions, provenance, and rights management, for consistent and accurate records.

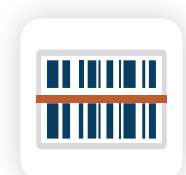

Bibliography: Link bibliographic references to objects, providing rich context and enhancing exhibition and research planning.

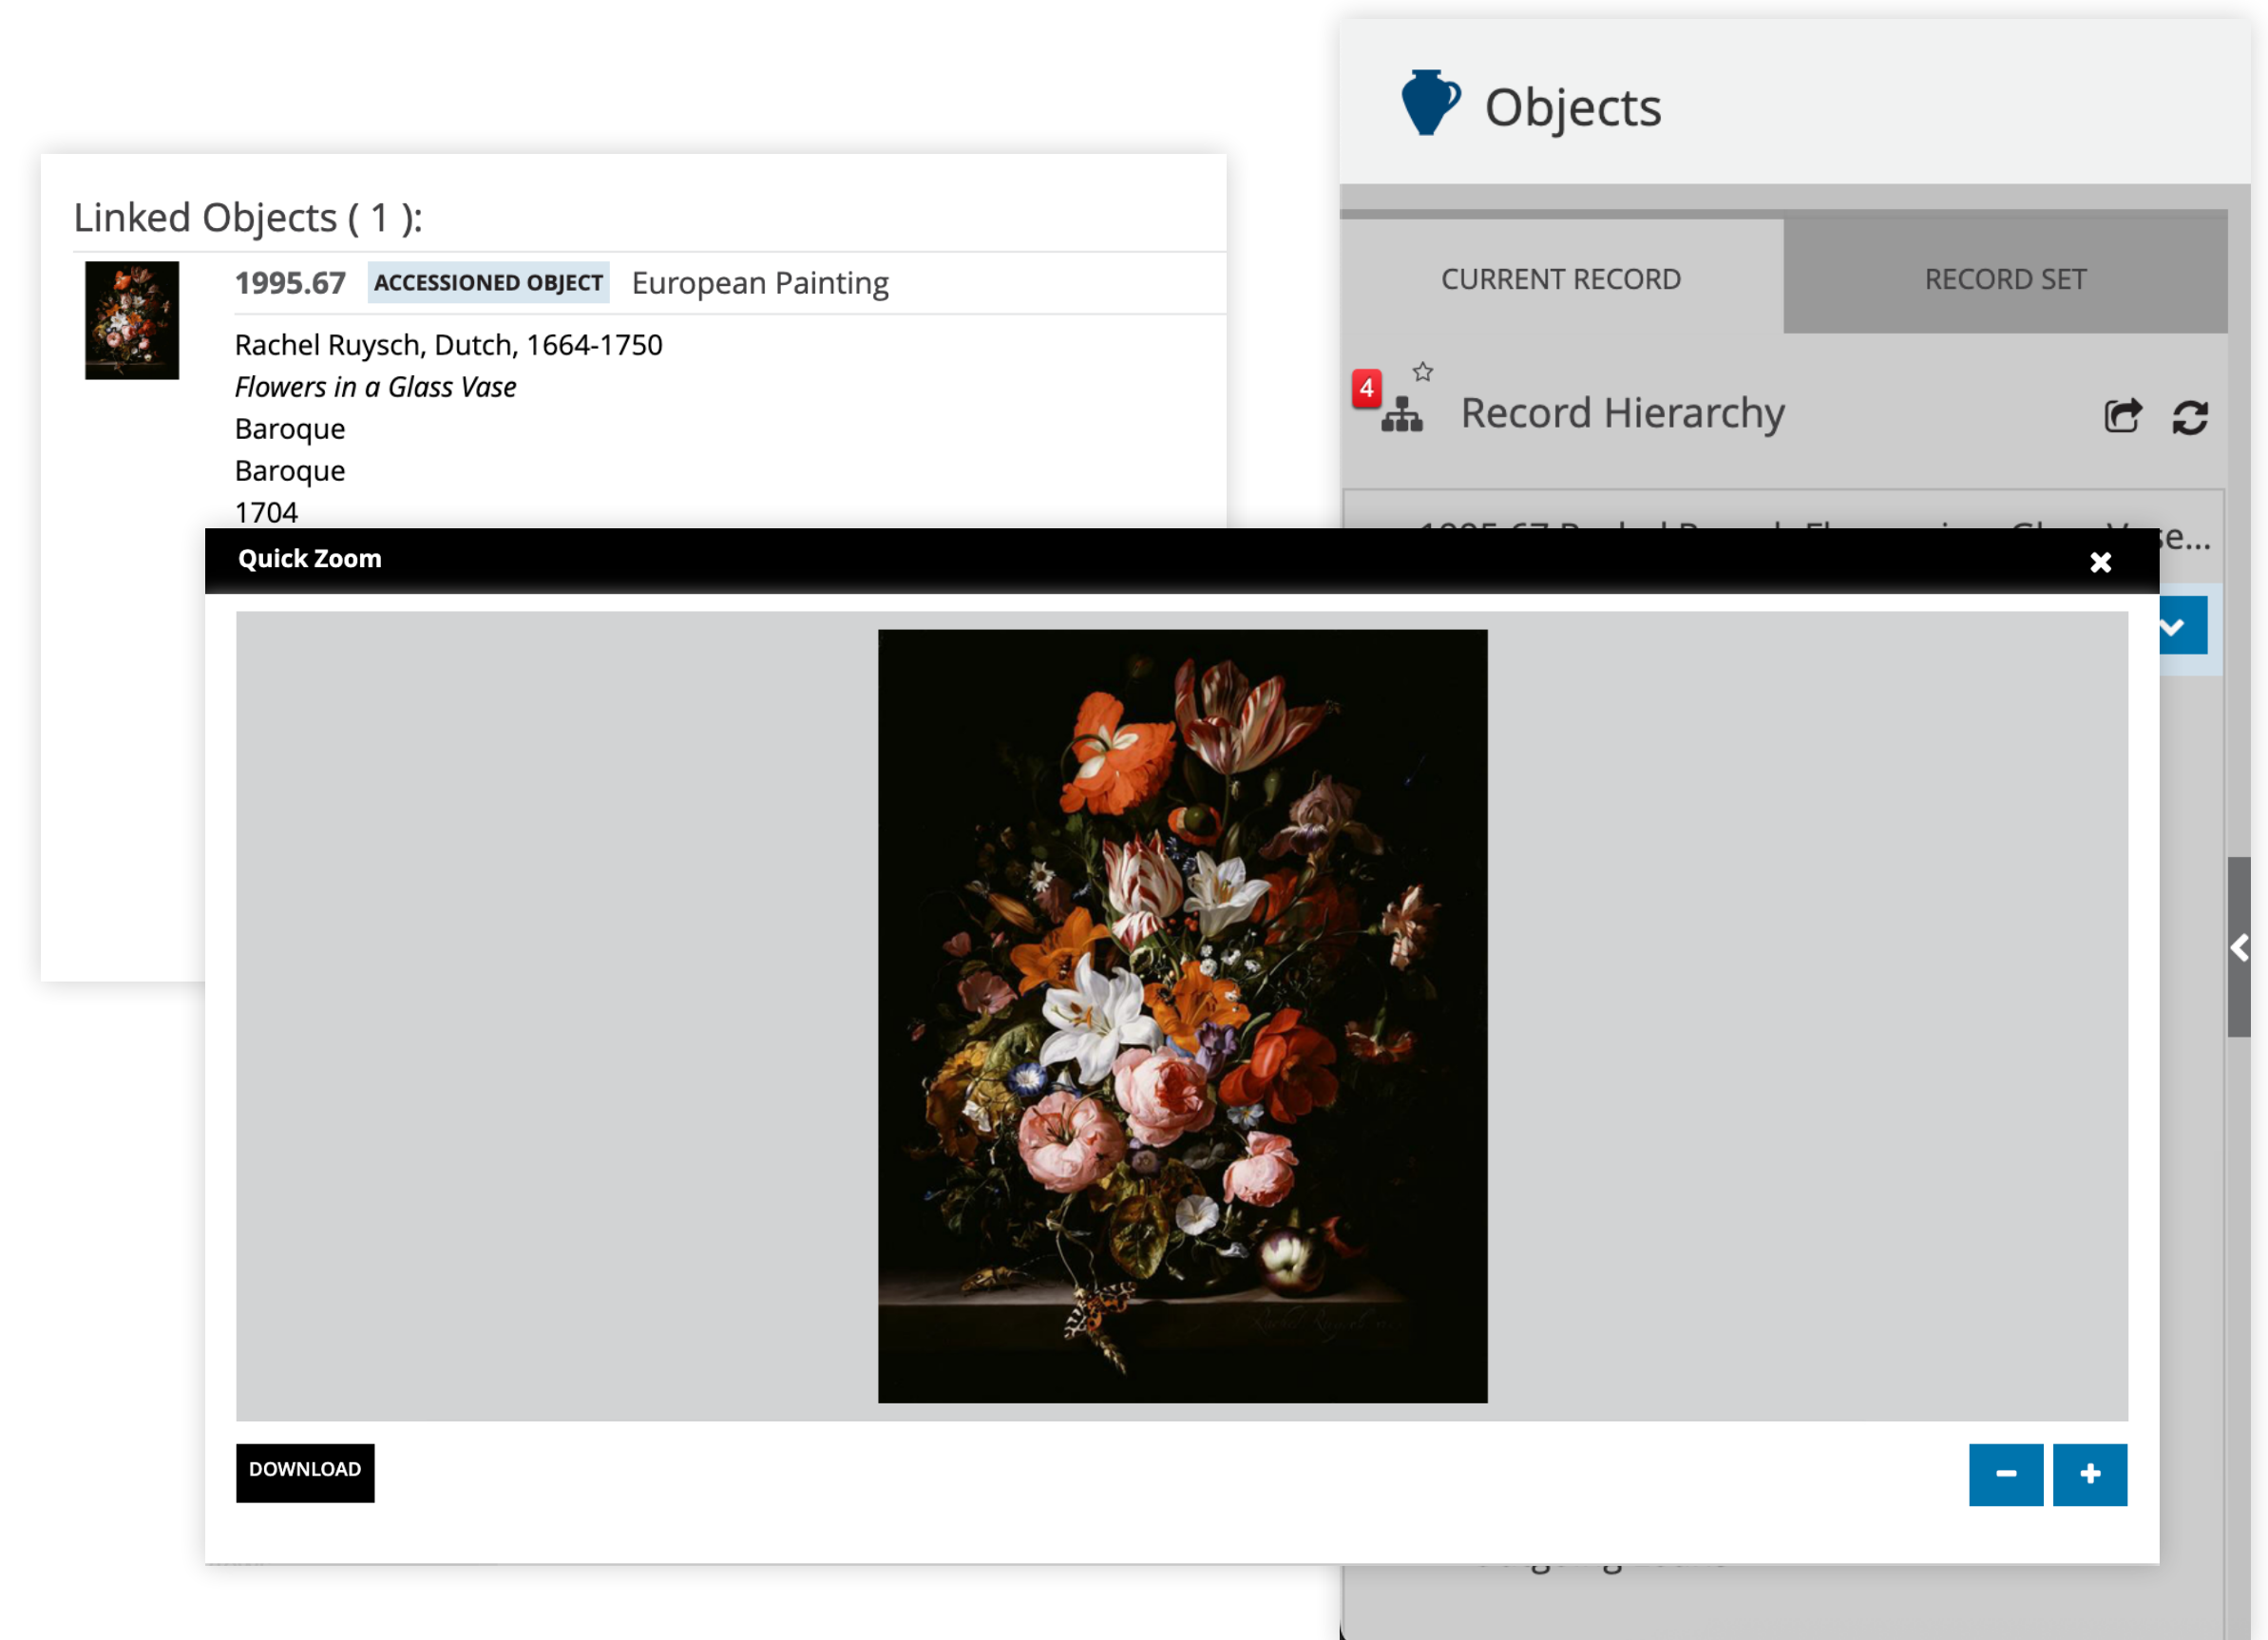

Media: Easily manage digital assets with drag-and-drop functionality, automatic metadata indexing, and advanced search capabilities.

Constituents: Maintain records for artists, lenders, conservators, and other key individuals or organizations, with cross-referencing across modules.

Crates: Track boxes and containers during movement, ensuring accurate management of physical objects throughout your institution.

The screenshot displays three overlapping interface windows from the TMS Collections system:

- Exhibitions:** Shows a record hierarchy for 'America is Hard to See' with a sub-section for 'Object' containing a table of exhibition objects.
- Shipping:** Shows a 'Related Shipments (to Loan)' table.
- Record Hierarchy:** Shows a 'Record Hierarchy' window for 'America is Hard to See' with a sub-section for 'Object' containing a table of exhibition objects.

Media	ExhObj Number	Object Number	Lender Object Number	Catalogue Number	Classification
	9				Ceremonial Objects
	14	63			Paintings
	15	92			
	16	9			

Shipment Number	Receipt Number	Ship From
SH.2000-3		Library of Congress Prints and Photographs Division
SH.2000-5		

STREAMLINED WORKFLOW MANAGEMENT

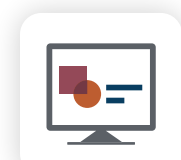

-  **Exhibitions:** Simplify exhibition planning with tools like Batch Updating and Flex Fields for better collaboration and efficiency.
-  **Loans:** Manage loan transactions, legal processes, and logistics with ease, simplifying documentation and tracking.
-  **Sites:** Track locations and venues related to your collections, ensuring accurate management of exhibition and storage sites.

INTEGRATED SOLUTIONS FOR GREATER EFFICIENCY

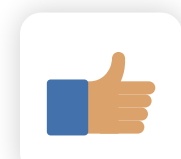

-  **Events:** Monitor events tied to your collections, such as exhibitions and talks, for better planning and engagement tracking.
-  **Shipping:** Streamline shipping logistics for exhibitions, loans, and conservation, with comprehensive tracking and compliance management.
-  **Insurance:** Manage insurance details, coverage, and claims, integrating this data with collection records for a complete overview.

TMS Collections provides powerful tools to streamline collections management, improve workflows, and ensure seamless integration. Here are the key features that make TMS Collections a leader in its field.

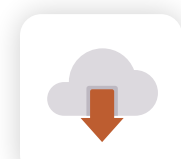

OPTIMIZED OBJECT AND DATA MANAGEMENT

Compatibility: Browser-based and built on Microsoft SQL Server, TMS Collections offers easy, reliable access to your data.

Standards Compliance: Compliant with international standards (SPECTRUM and CCO) for seamless cataloging and data exchange.

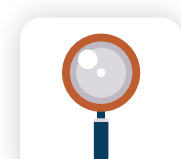

Data Entry & Exporting: Customize data entry forms and export directly to Word or Excel, improving efficiency in managing collections.

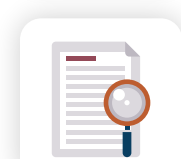

Batch Data Import: Quickly import large datasets using Excel or XML for fast, accurate data entry.

POWERFUL SEARCH & ACCESSIBILITY

Quick Searching: Easily search with powerful term searches and filters, saving query results for quick future access.

Advanced Search: Refine searches across large datasets with advanced search functionality, improving data retrieval.

EFFICIENT WORKFLOW MANAGEMENT

Exhibition Management: Manage all exhibition aspects—multi-venue, touring, and single-venue displays, including loans and coordination.

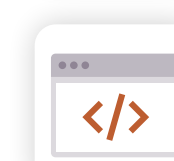

Configurability: Customize data views, workflows, and dashboards to match your institution's needs, ensuring user-friendly access.

Dynamic Reporting: Access pre-configured reports or request custom ones to fit your specific requirements.

Archival Management: Efficiently manage archival collections with features designed for tracking and preservation.

TMS Collections API Library: Integrate with other systems for increased flexibility and data exchange capabilities.

GLOBAL COLLABORATION AND MULTILINGUAL SUPPORT

Multilingual Functionality: Supports 24 languages, with full Unicode compliance, allowing seamless international collaboration.

TAILORED SOLUTIONS TO EMPOWER YOUR TEAM

TMS Collections

At Gallery Systems, we offer comprehensive training programs designed to help your team maximize the potential of our software. Whether you need one-to-one advanced application training or a specialized group workshop, we provide flexible options that cater to your needs.

Training can be conducted on-site, via remote screen-sharing sessions, or at our New York office.

EXPLORE OUR TRAINING OPPORTUNITIES

CONFIGURATION

Our Configuration training provides a deep dive into application orientation, navigation, security group administration, and authority management. This session is designed to provide a comprehensive understanding of how to configure the application to suit your institution's needs.

LEVEL I & II USER

Level I and II User training covers both basic and advanced user functionality. From getting started to mastering more complex features, our instructors will provide hands-on guidance on how to make the most of TMS Collections in your organization, with tips for efficiency and effectiveness.

REPORTING

Harness the power of reporting with Crystal Reports and Microsoft SQL Server Reporting Services (SSRS). Learn how to create customized reports and query the TMS Collections data structure for detailed insights, enabling your team to generate impactful reports with ease.

SYSTEM ADMINISTRATION

For staff responsible for managing and maintaining your database and application, we provide training on software installation, security, configuration options, TMS Collections administration, and associated utilities.

CUSTOMIZED SESSIONS & WORKSHOPS

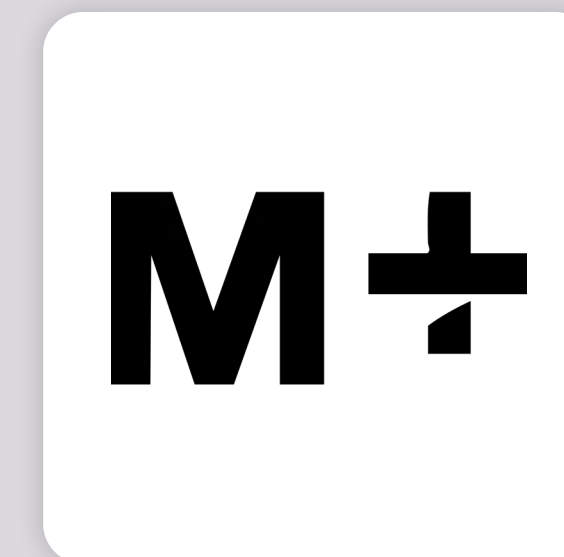

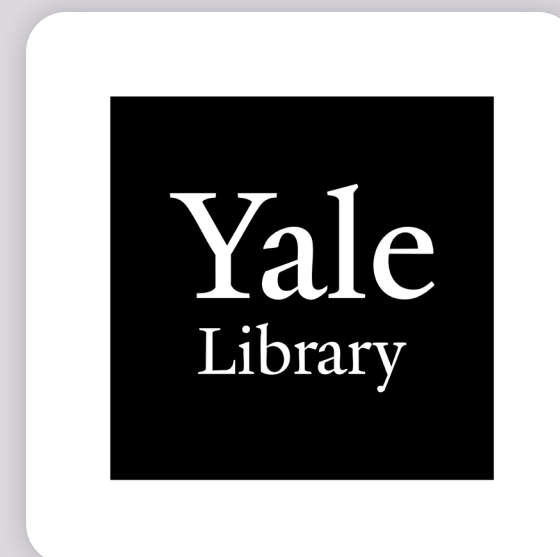

For organizations with specific needs, our Customized Training focuses on particular processes or functionalities. Whether its curators learning about object-related information or exhibition organizers diving deep into exhibition management, we tailor each session to ensure relevance and effectiveness for your team.

TRUSTED BY LEADING INSTITUTIONS WORLDWIDE

TMS Collections

Gallery Systems are proud to work with a diverse range of clients from across the globe, empowering them to manage, preserve, and share their collections with confidence. With over 1,000 clients, our software is trusted by museums, galleries, archives, and cultural institutions of all types and sizes—ensuring that their collections are efficiently managed, accessible, and preserved for future generations.

FEATURED CLIENTS

These are just a few examples of the variety of institutions that rely on our software. Whether managing diverse art collections, historical archives, or specialized objects, our clients represent the broad spectrum of cultural heritage organizations worldwide.

A Unified Platform for Your Collection

The TMS Suite is a comprehensive, interconnected platform designed to evolve with your needs. By using a shared database across all products, the TMS Suite ensures that all systems work together without the headache of managing separate integrations.

With TMS Collections at the core, your institution can easily scale and add on complementary tools to enhance functionality, support specialized workflows, and grow your collection management capabilities over time.

These solutions are built to work together, providing a cohesive and comprehensive solution for your collections management:

TMS **Media Studio**

A user-friendly and robust Digital Asset Management System (DAMS), Media Studio provides secure, rights-based access to media files across your organization, allowing you to manage all types of media effortlessly.

TMS **Conservation Studio**

Tailored for conservators, this powerful tool streamlines conservation workflows. It manages project tracking, survey and treatment data, reports, images, and other media, helping conservators increase efficiency and enhance documentation.

e**Museum**

Publish your collection online to engage visitors, support educational programs, and drive research initiatives. Compatible with IIIF and Linked Data, eMuseum enables rich, interactive experiences while offering complete API services for further customization.

Barcode Manager

Simplify inventory management by using Barcode Manager to batch process location changes on-site. With support for any scanning device, it helps track object movements efficiently and ensures your collection data remains accurate and up-to-date.

TMS COLLECTIONS: THE CORE OF THE TMS SUITE

Seamless Integration

Each of these products seamlessly integrates with TMS Collections, creating a unified experience across your collection management processes. Whether you are managing collections data, publishing online exhibitions, tracking conservation efforts, or organizing media files, everything flows through the central hub of TMS Collections. This integrated approach ensures that your workflows remain streamlined, your data is consistently updated, and all tools work in concert to meet your institution's evolving needs.

Future-Proof Your Collection Management

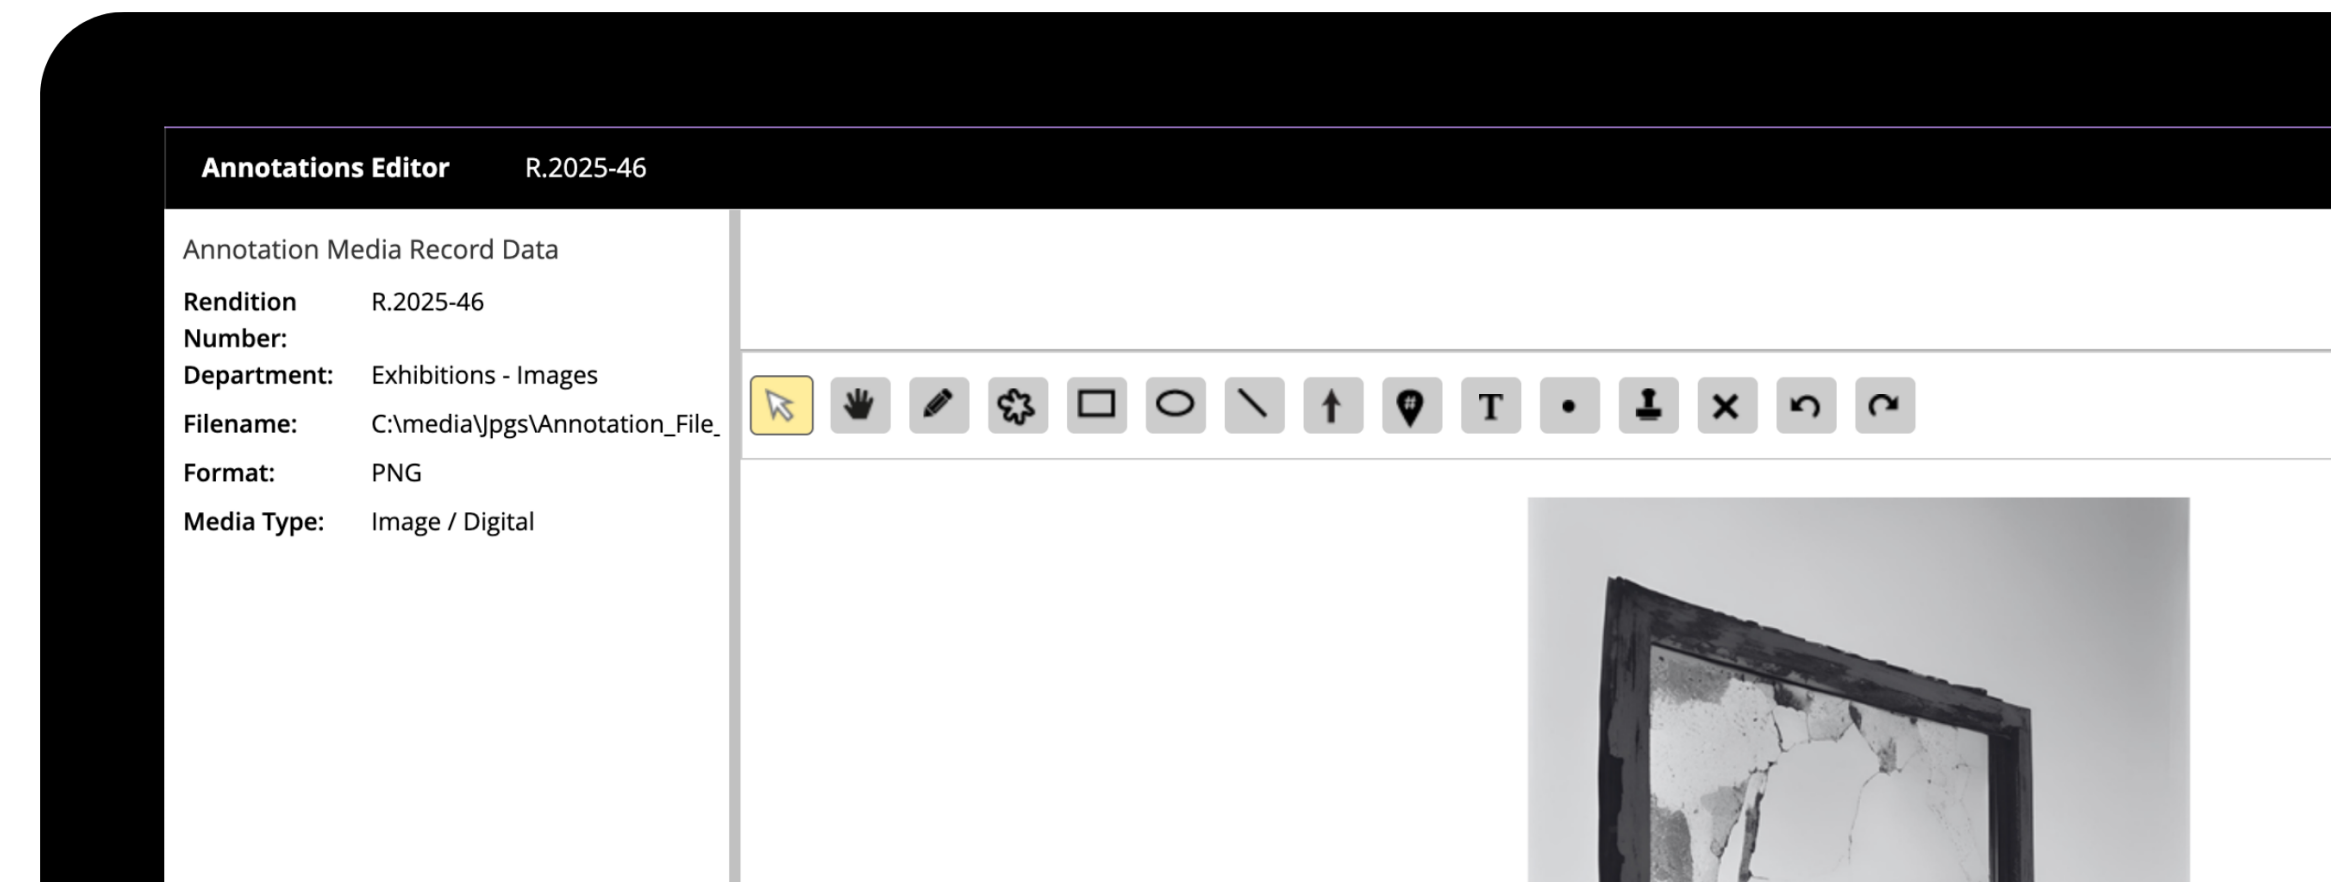

The TMS Suite's flexibility means that as your institution grows or your needs evolve, you can easily incorporate new products, features, and services to continue improving your operations. Whether you are looking to improve collection access, enhance security, or optimize workflows, TMS Collections and its suite of add-ons will support you every step of the way.

With TMS Collections at the core, the possibilities are endless, offering the scalability and integration you need for today and the future.

TMS Collections

Spectrum
..... Partners

TMS Collections is fully **Spectrum compliant**, supporting best-practice workflows for acquisition, cataloguing, loans, and more. By aligning with the leading international standard, it helps institutions meet professional requirements, ensure accountability, and support accreditation with confidence.

TMS Collections is a web-based application accessible through your browser. To provide flexibility and ease of use, clients can choose between provisioning and managing their own servers or leveraging Gallery Systems' Managed Hosting. By opting for Managed Hosting, you can leave the technical details to us—ensuring seamless access and top-tier security—so you can focus on managing your collections.

Comprehensive Hosting Solutions

With Managed Hosting, we take care of the entire technology stack for you. This includes everything from the initial installation and setup to hardware purchases, software configuration, and ongoing updates. Our team of experts ensures your system runs smoothly, so you can concentrate on what matters most: managing and safeguarding your collection.

We host TMS Collections on Amazon Web Services (AWS), one of the most secure and scalable cloud platforms available. By hosting on AWS, we provide enhanced security, uptime reliability, and the ability to scale with your needs. Our robust hosting infrastructure is designed to give you peace of mind, knowing your data is protected by cutting-edge security measures.

KEY BENEFITS OF MANAGED HOSTING

- **No Hardware Costs:** Eliminate the need for server purchases or maintenance.
- **Automatic Updates:** Stay up-to-date with the latest features and security patches.
- **Automatic Backups:** Your data is securely backed up and retrievable.
- **Secure Access:** Your data is protected by cutting-edge security measures and firewalls.
- **Scalability:** Easily scale your system as your institution grows.

Gallery Systems takes IT security seriously. Protecting your institution's data is our top priority, and we continuously invest in robust security protocols to ensure the safety, integrity, and privacy of your collection data.

Proactive Security Measures

We have implemented comprehensive, multi-layered security protocols to safeguard all aspects of TMS Collections. This includes secure cloud hosting through Amazon Web Services (AWS), where we benefit from industry-leading security features such as encryption, firewalls, and access control. In addition, we utilize Intelligent WAF (Web Application Firewall) security, which continuously improves over time by learning from attacks and proactively defending against emerging threats. Our systems are consistently updated with the latest security patches, and our infrastructure is designed to detect and respond to security threats in real-time, ensuring the highest level of protection for your data.

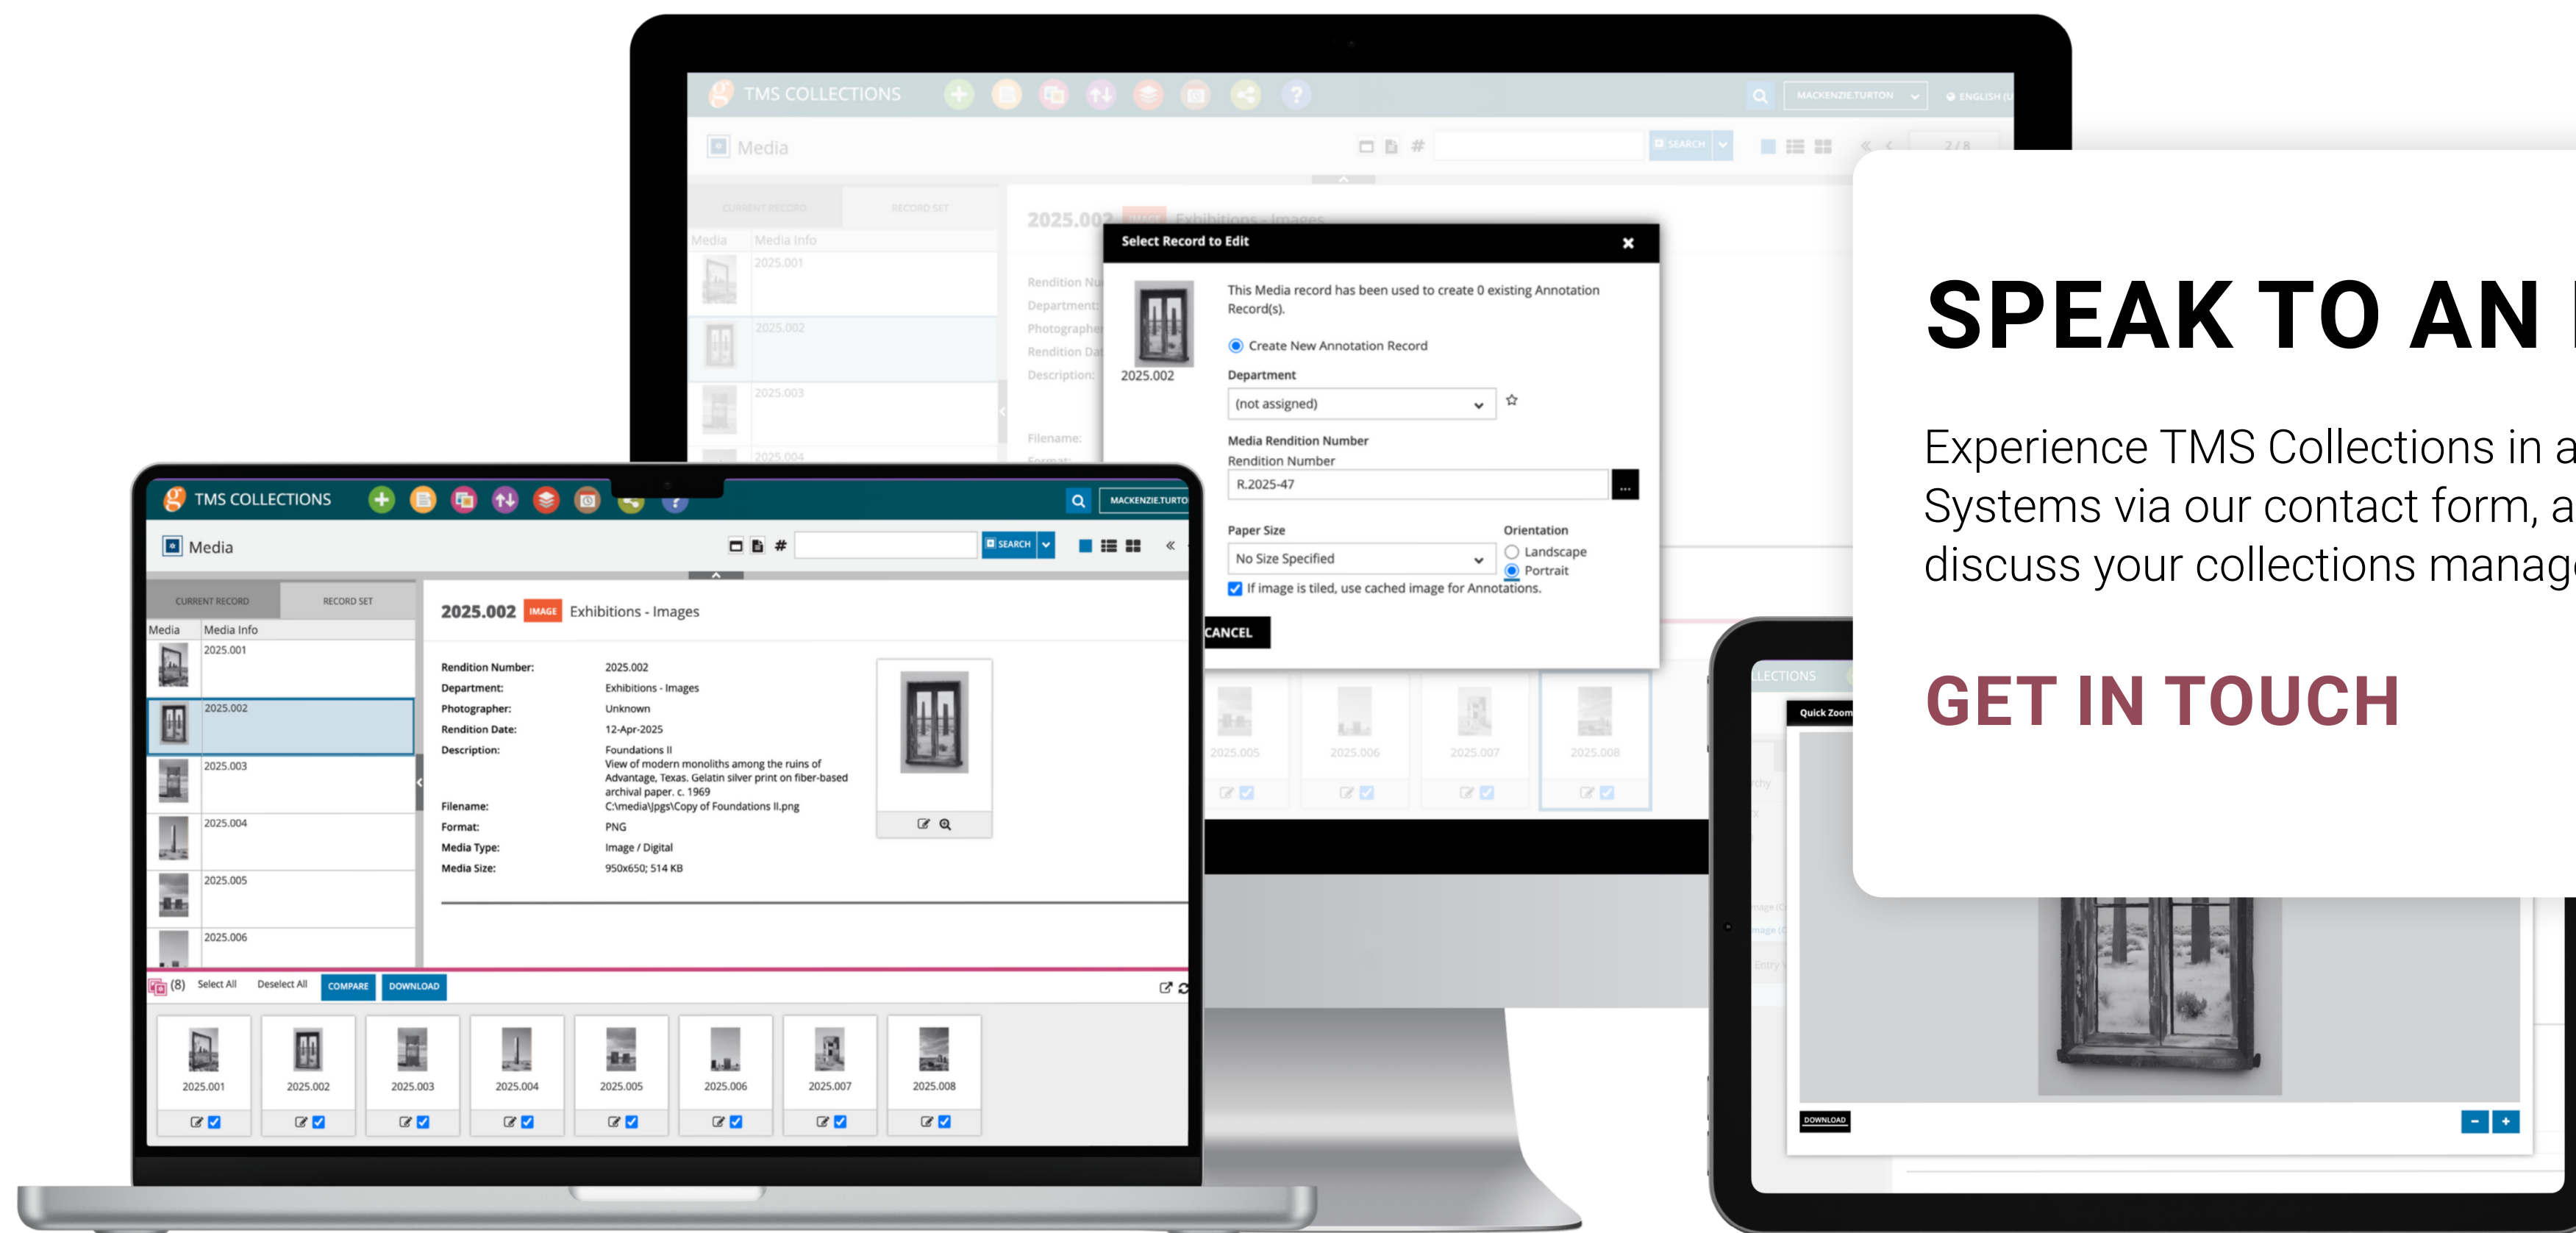

ISO 27001 and Compliance Standards

Gallery Systems is dedicated to maintaining the highest standards for IT security. We strictly adhere to **ISO 27001**, the internationally recognized standard for information security management. This commitment ensures that we consistently follow best practices for protecting your data, from risk management to robust security controls. Notably, ISO 27001 requires an annual independent third-party audit to verify our compliance, ensuring we maintain the highest level of security integrity.

All data within TMS Collections is fully encrypted both at rest and in transit, using strong encryption protocols at every level. We leverage Amazon Web Services (AWS) as our cloud hosting platform, benefiting from its advanced security features and compliance with modern best practices.

TMS Collections also passes **FedRAMP** standards, which is a U.S. government-backed standard that ensures cloud services meet stringent security requirements. By aligning with these globally recognized frameworks, we ensure that TMS Collections is managed with top-tier security practices.

We are constantly reviewing and enhancing our security policies, keeping pace with evolving threats and ensuring that TMS Collections provides a safe and secure environment for your institution's data.
