

# TMS Conservation Studio

**STREAMLINING CONSERVATION  
MANAGEMENT FOR MUSEUMS**

STREAMLINE YOUR CONSERVATION WORKFLOW

# TMS Conservation Studio

TMS Conservation Studio is an easy-to-navigate web-based tool designed to support conservation work.

TMS Conservation Studio integrates with Gallery Systems' CMS TMS Collections to streamline your conservation processes, and consolidate project management, scientific information, treatment data, surveys, reporting, and image management. Users can access their data securely from any computer, anywhere.

## WHY CHOOSE TMS CONSERVATION STUDIO?

# TMS Conservation Studio

### Efficiency & Time Savings

Streamline your conservation work with time-saving features that allow you to manage projects, annotate high-resolution images, and cross-link related activities—faster and more easily.

### Centralized Data Management

Keep all your conservation information in one central, accessible location, ensuring consistency and making it easy for all stakeholders to access and update data.

### Improved Collaboration

Enhance coordination across teams by fostering seamless collaboration between conservators, curators, registrars, exhibition teams, and external partners.

### Simplified Workflows

Replace tedious, paper-based processes with streamlined digital workflows, reducing errors and freeing up valuable time for more important tasks.

Track object details, manage projects efficiently, and generate tailored reports, all integrated for seamless coordination.

### OBJECTS MODULE

#### Informed Decision-Making

View objects from a conservation-focused perspective, showcasing key details like medium, dimensions, environmental needs, light exposure, and sensitivity. Access a full conservation history for each object in one central location, offering a complete overview to support informed decision-making.

### PROJECTS MODULE

#### Streamlined Coordination

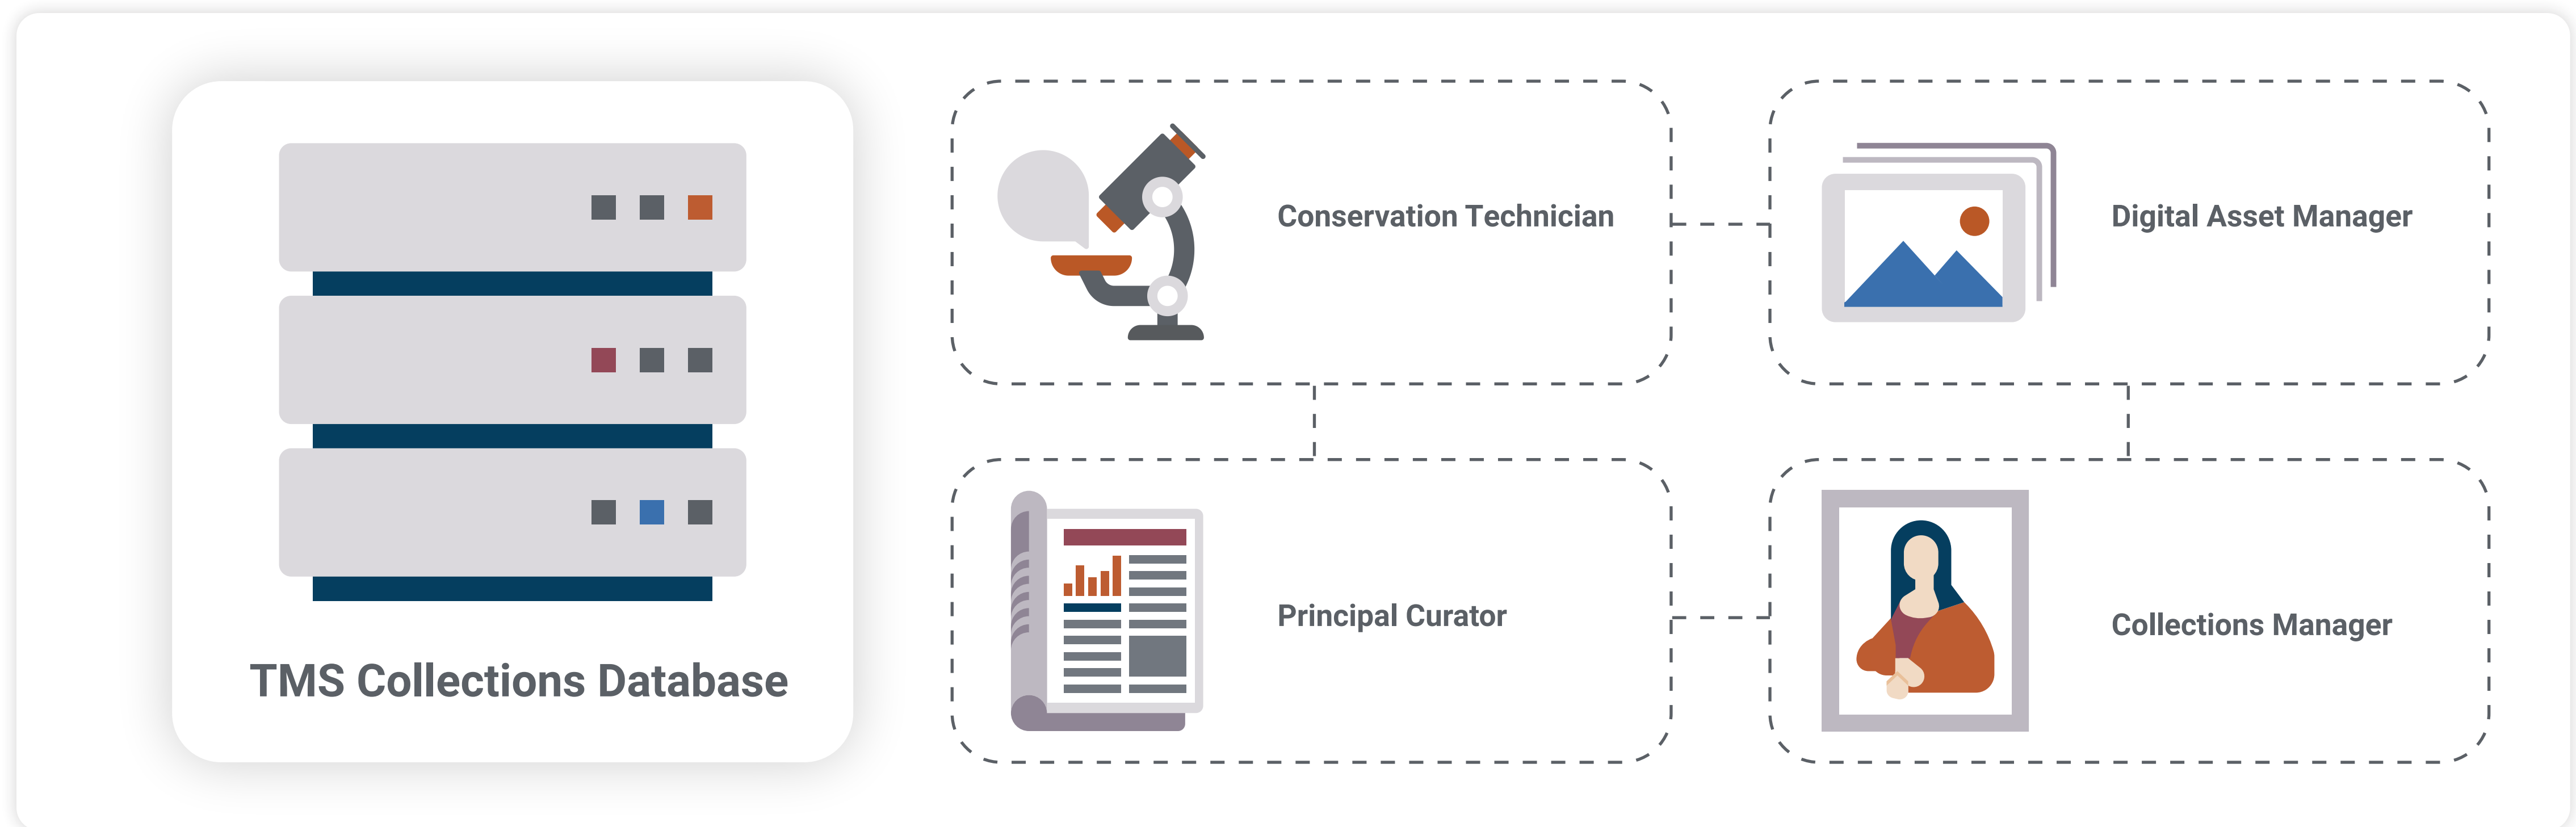

Streamline complex conservation projects by consolidating elements like objects, reports, loans, and exhibitions into a searchable dataset. Quickly batch add or update conservation reports for objects, and seamlessly access TMS Collections to add objects, exhibitions, and existing packages to your project.

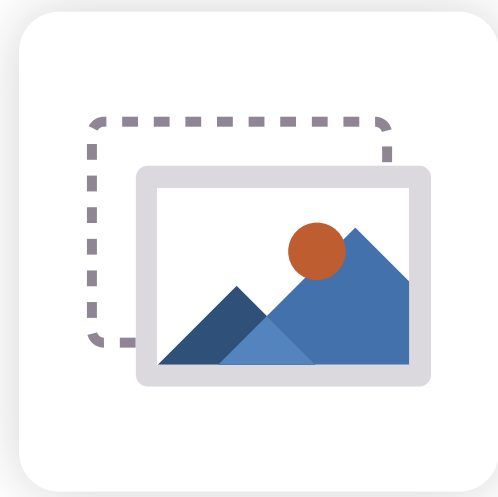

### CONSERVATION REPORTS MODULE

#### Tailored & Efficient Reporting

Access detailed conservation reports and link them to objects, media, conservators, and projects. Customize reports with configurable forms and fields to suit specific specialties like paper, textiles, paintings, or time-based media. Save time using report templates that apply standardized formats, boosting efficiency in documentation.

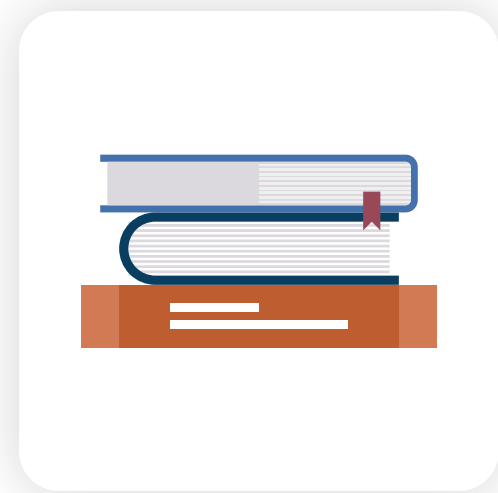

A shared database fosters seamless collaboration across various roles and departments, ensuring that all relevant data is easily accessible and connected.

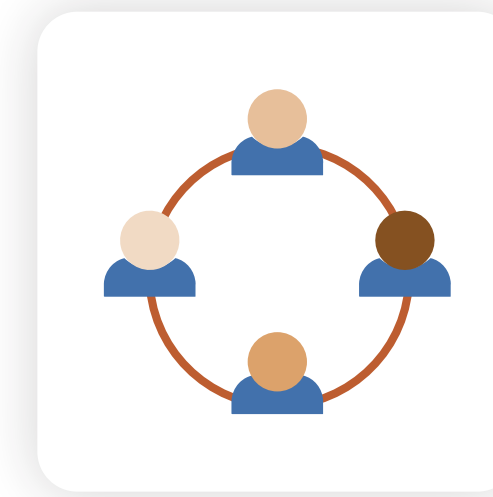

## Enhanced Media Management

Easily link media records to conservation reports, including before, during, and after photos of object treatments. Add specialized media files such as X-rays, infrared photography, ultraviolet images, and conservation-related text documents to your records.

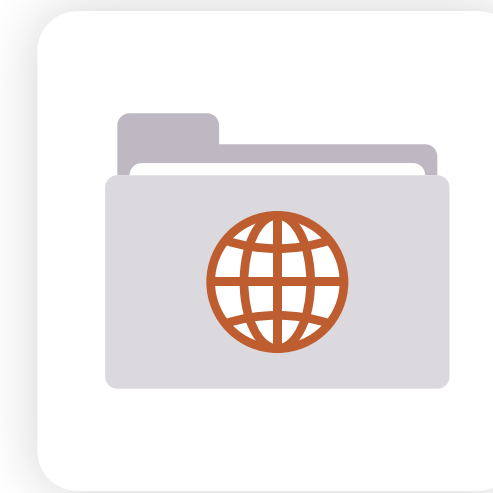

## Integrated Bibliography for Research

Link TMS Collections' bibliography records to conservation reports to track research references and cite relevant papers and publications. View these references and citations directly within object records, ensuring that all research is organized and accessible.

## Improved Collaboration with Constituents

Link conservators to treatment and condition reports, with support for multiple contributors per report. By cross-referencing constituent records with other modules in the TMS Suite, your team can quickly access relevant conservation reports and details.

## Stay Connected with Exhibitions & Loans

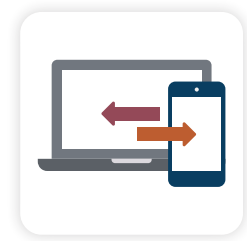

Link related exhibition and loan records to the Projects module to stay up-to-date with current exhibition plans. Whether you're in the field or traveling, you can access these records remotely, keeping you informed and connected no matter where you are.

## EASY ACCESS FOR COLLABORATIVE WORKFLOWS

Maximize efficiency and collaboration by working in a unified ecosystem that connects conservation with collections management.

**Fully Integrated with TMS Collections:** Seamlessly access object records without re-entering data. Work efficiently across both platforms while maintaining institutional security settings and collaborating easily with non-conservation colleagues.

**Access Anywhere with Web-Based Flexibility:** Access TMS Conservation Studio from any device, laptop, tablet, or desktop, without interruption to your workflow, whether you're in the gallery, lab, or field.

**Tailored to Your Needs with Configurable Views:** Customize fields, forms, and screen layouts to suit your role and discipline. Your personalized dashboard offers an overview of projects, assignments, and upcoming tasks, saving you time and improving focus.

## DETAILED MANAGEMENT FOR COMPLEX OBJECTS

Effectively manage conservation work on objects with multiple parts or materials using precise tools designed for complexity.

**Manage Multi-Part Objects with Precision:** Handle complex objects, like furniture, armor, or composite artifacts, with the ability to treat and document each part individually, ensuring complete and accurate records.

**Enhance Clarity with Image Annotation Tools:** Use built-in markup tools to highlight areas of deterioration, add notes, and leave comments directly on images. Annotations remain part of the image record for ongoing reference.

## DOCUMENTATION BUILT FOR CONSERVATION

Simplify and standardize conservation records using intuitive, searchable templates designed for detailed documentation and reporting.

**Efficient and Streamlined Documentation:** Use structured templates to document condition reports, treatment proposals, surveys, and scientific analyses with discipline-specific data elements.

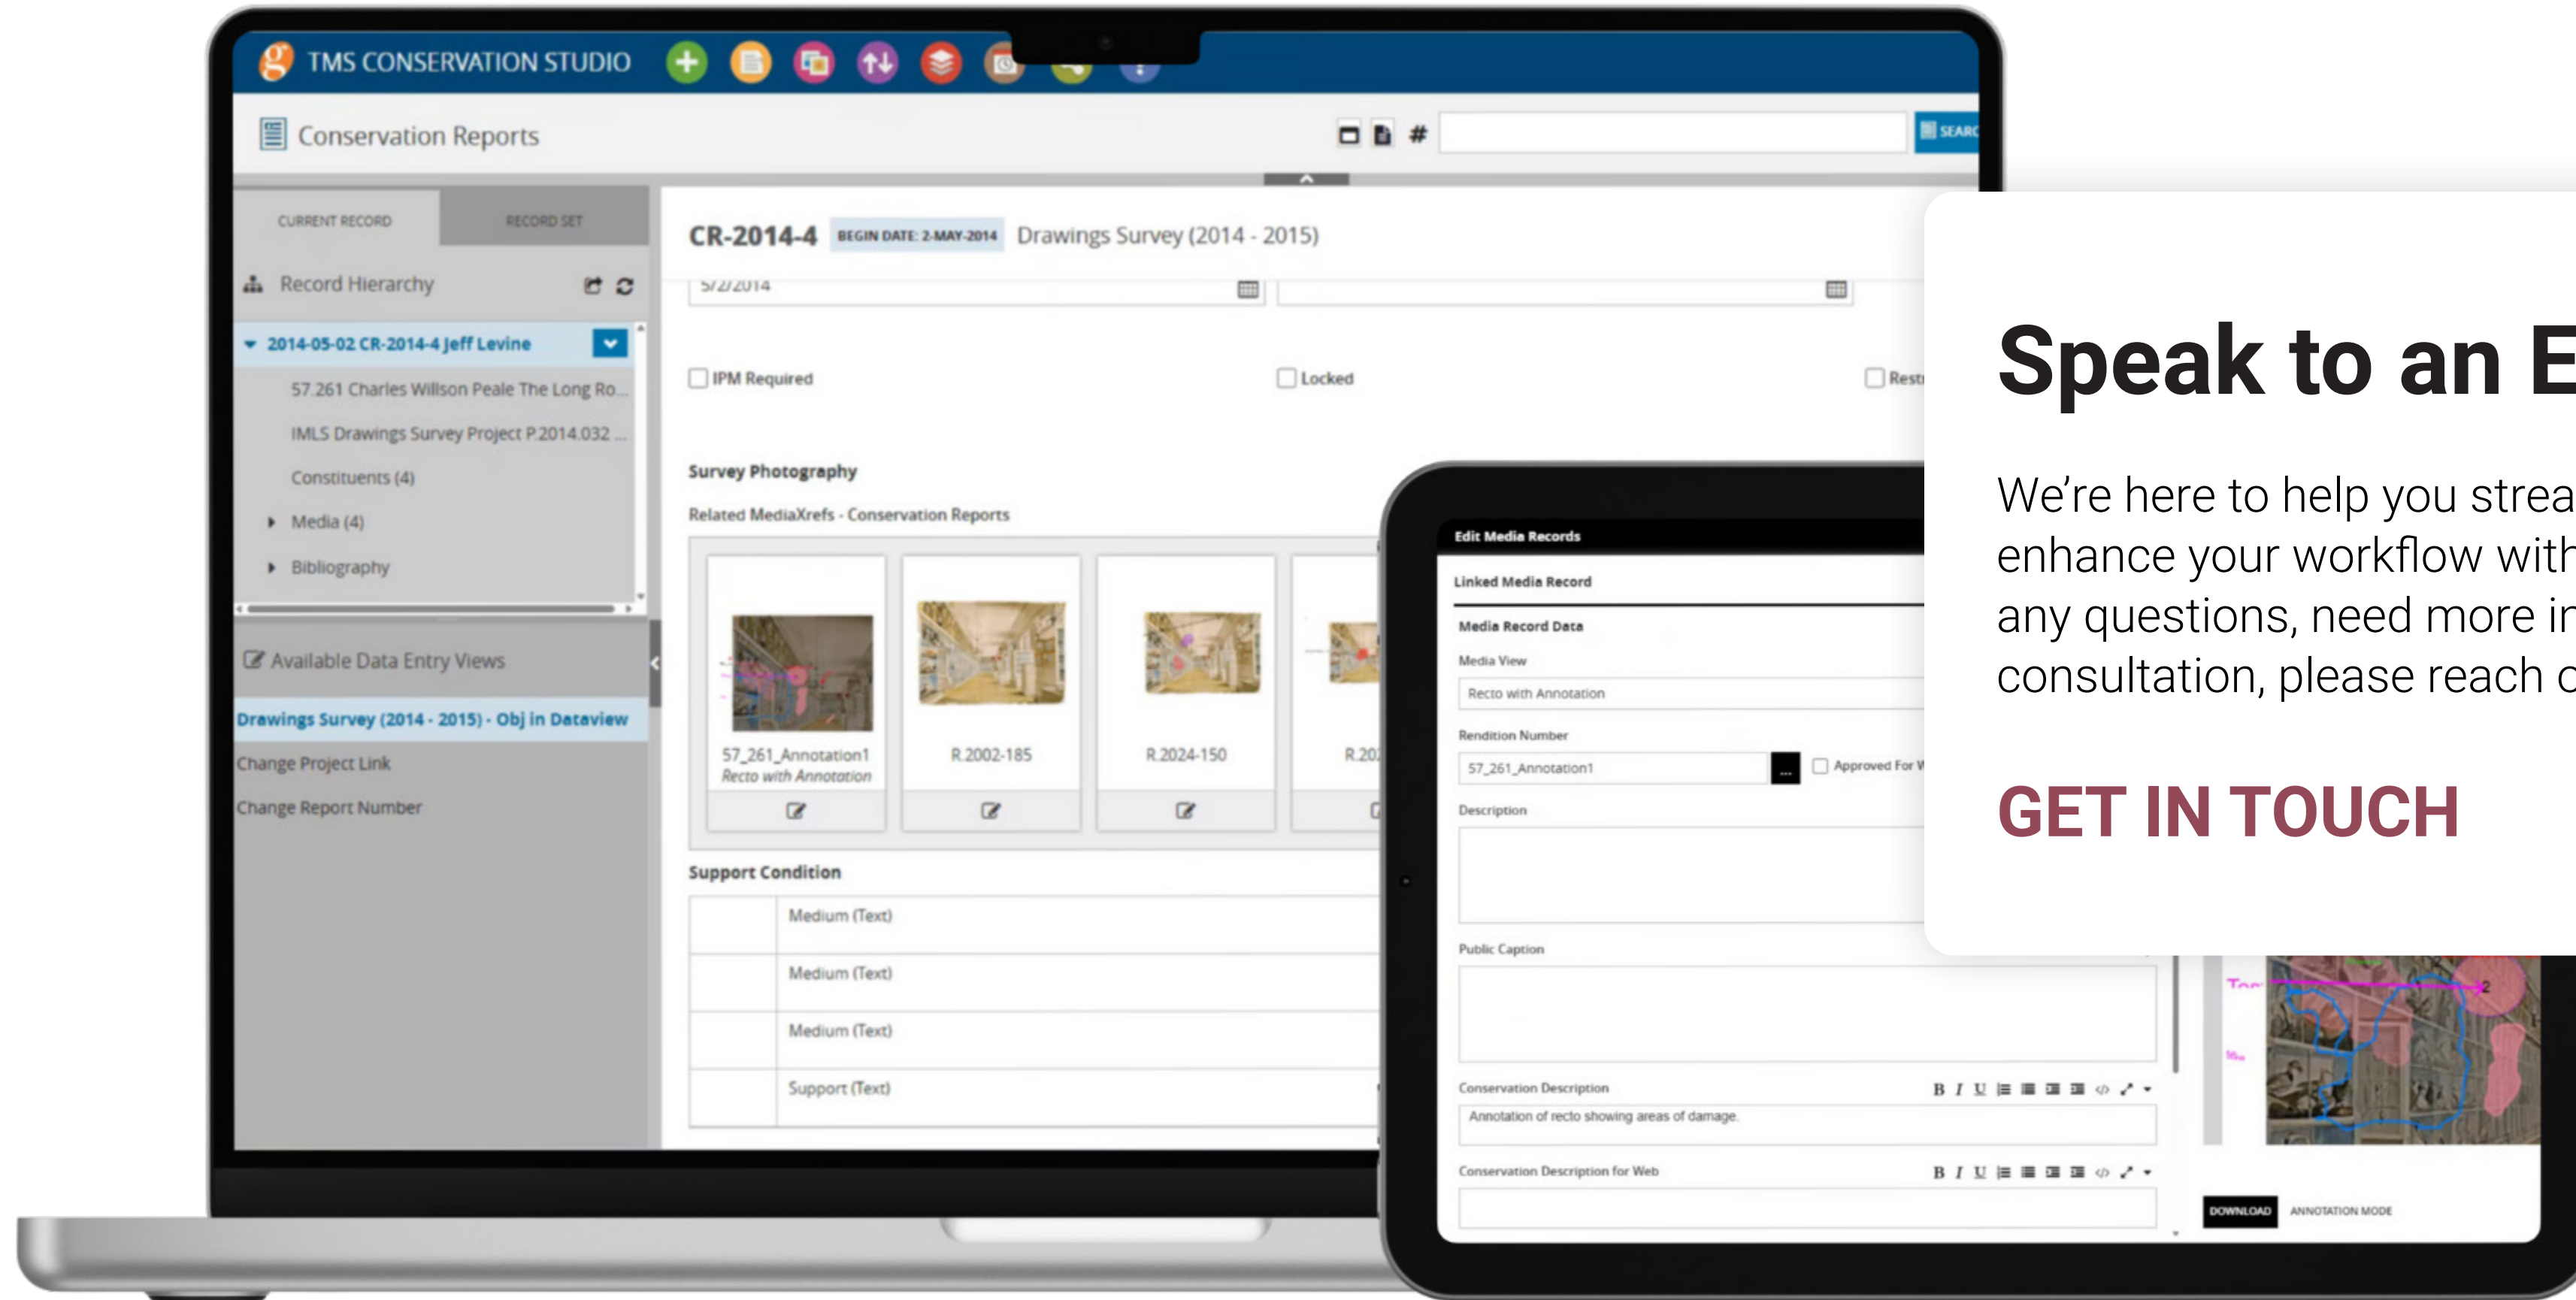

**Searchable and Indexed Data:** All documentation is indexed and searchable for easy access, research analysis, project tracking, and generating statistics.

**Excel Export Functionality:** Export lists and data to Excel for external analysis, reporting, or sharing with colleagues.

## Speak to an Expert?

We're here to help you streamline your conservation processes and enhance your workflow with TMS Conservation Studio. If you have any questions, need more information, or would like to schedule a consultation, please reach out to us.
