

eMuseum

**PUBLISH COLLECTIONS
ONLINE WITH CONFIDENCE**

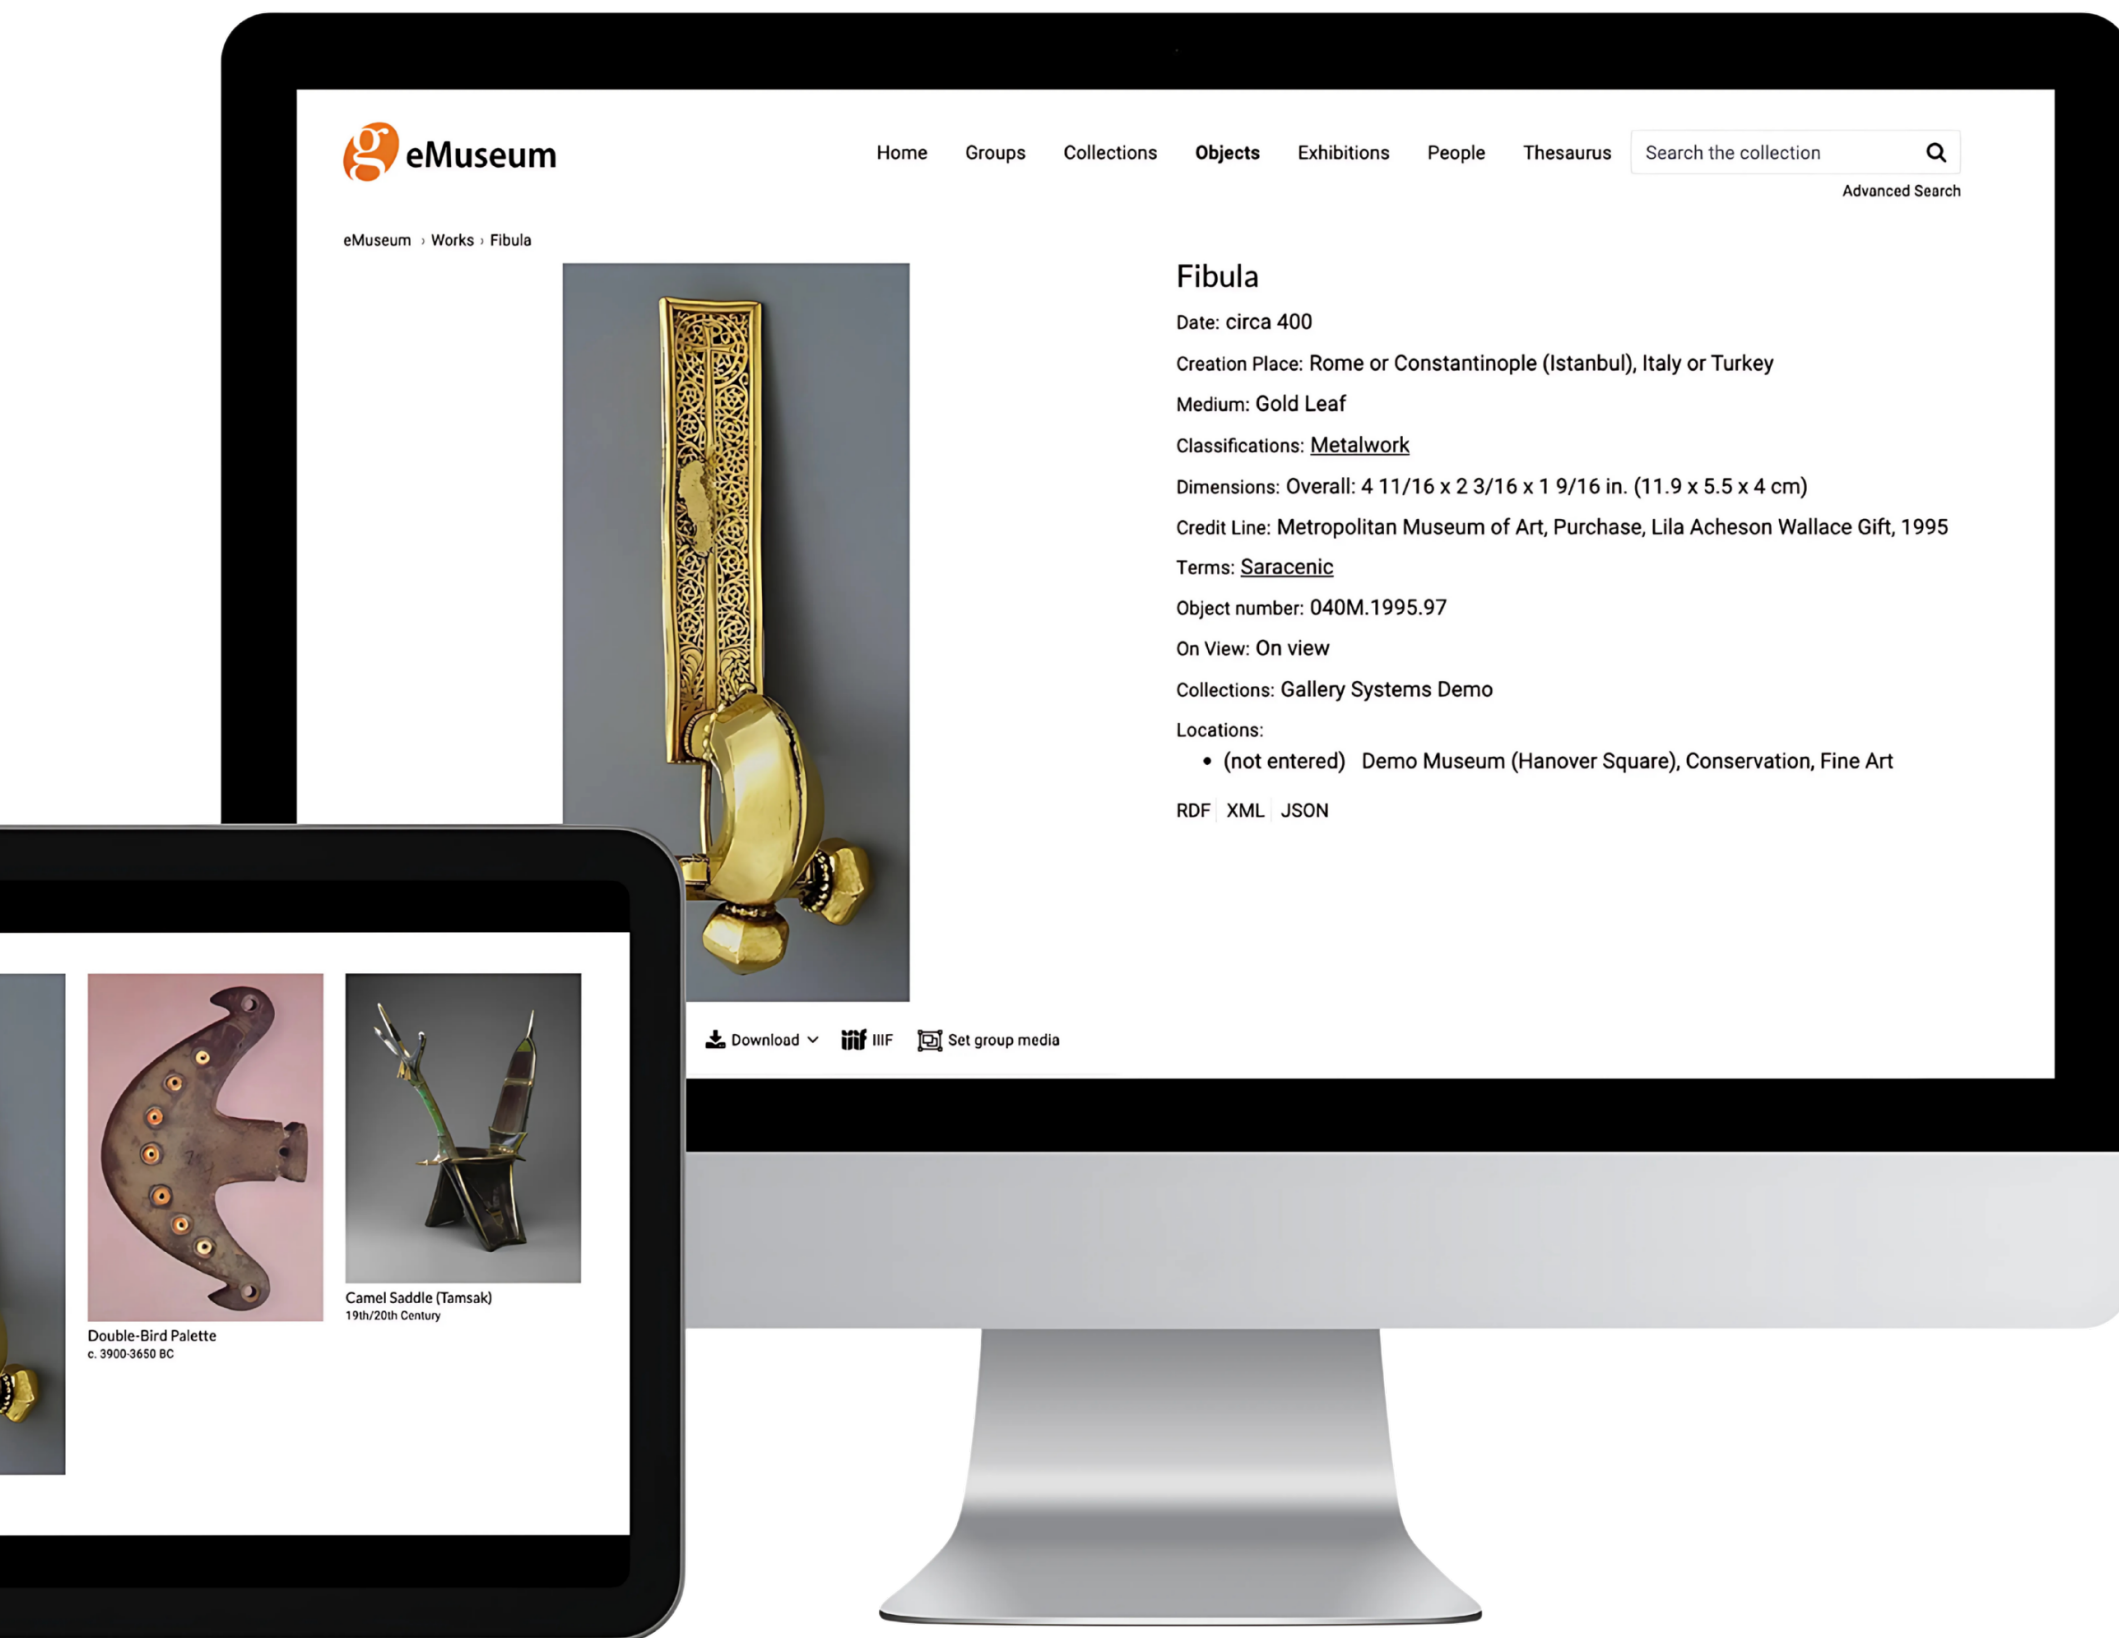

eMuseum transforms the way institutions share and showcase their collections, enabling both staff and visitors to engage with cultural heritage in powerful new ways. With eMuseum, you gain valuable insights into user interactions through **detailed metrics and analytics**, empowering you to continuously improve engagement and **customize the experience**. Whether you're presenting a global showcase or curating a private exhibition, eMuseum's intuitive platform makes it effortless to deliver rich, contextual content.

WHY CHOOSE EMUSEUM?

eMuseum

Integrated with the TMS Suite

eMuseum works hand-in-hand with TMS Collections, making it easier than ever to publish and manage your collection.

Flexible API for Custom Solutions

Our robust, fully-documented API enables you to integrate your content with external applications and create custom solutions to fit your unique needs.

Powerful Search Capabilities

eMuseum's advanced search functionality allows users to easily find objects, exhibitions, or records with precise filters and customized metadata.

Fully Customizable Experience

Tailor every aspect of your online collection, from the design and layout to how you present your objects, to match your institution's branding and goals.

Interactive and Engaging Media Formats

Engage your audience like never before with rich media support, including images, videos, 3D models, and more, creating a dynamic and immersive experience.

Mobile-Ready

Whether on a smartphone, tablet, or desktop, eMuseum ensures your collection is accessible and responsive across all devices.

eMuseum enhances how institutions share, manage, and engage with their collections. Its flexible, powerful features improve access, collaboration, and data management, all while providing an engaging experience for users.

MAXIMIZE EXPOSURE AND ACCESS

LIMITLESS POSSIBILITIES

Deploy eMuseum as an intranet or public website with responsive design features and advanced data-sharing capabilities. The IIIF API lets you easily integrate with other systems and share your collection.

MULTILINGUAL FLEXIBILITY

Fully Unicode compliant, eMuseum supports multilingual publishing and searching. Users can choose their preferred language manually or benefit from automatic locale detection for a globally inclusive experience.

POWERFUL SEARCH

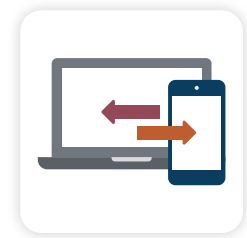

Search across all fields using intuitive and advanced tools. Refine results with dynamic filtering by geolocation, time period, and more. Contextual links, category tagging, and online tagging offer a structured and discoverable data experience.

ENHANCE COLLABORATION AND ENGAGEMENT

Maximize efficiency and collaboration by working in a unified ecosystem that connects conservation with collections management.

My Collection: Users can curate and share personalized collections. For deeper collaboration, shared collections can be co-edited by multiple users, making it ideal for group projects or academic work.

Engaging Experience: Access your collection across all devices and explore interactive media including images, videos, sound, documents, and PDFs. “You may also be interested in...” recommendations and related works enrich the discovery experience.

Social Media Integration: Encourage user interaction and outreach with seamless social media sharing and support for tagging content for visibility and engagement.

STREAMLINE DATA MANAGEMENT

Effectively manage conservation work on objects with multiple parts or materials using precise tools designed for complexity.

Dynamic Data Integration: eMuseum integrates directly with TMS Collections and TMS for Windows, serving as a streamlined content management system. Manage information, images, and digital assets from within TMS Collections or TMS for Windows, without repetitive extraction.

Customizable Views: eMuseum runs on any platform. It's fully customizable through HTML, CSS, and JavaScript templates, and can be extended with additional functionality as your needs grow.

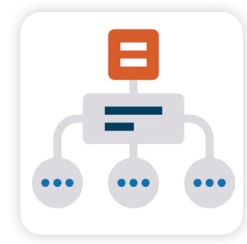

Admin Control: eManage site content and visibility, configure layout options, and track performance metrics. Built-in SEO optimization improves your collection's discoverability online.

Multi-Level Security: Create tiered access levels with password-controlled roles for curators, scholars, educators, and public users, ensuring the right access for the right audiences.

GAIN INSIGHTS AND OPTIMIZE

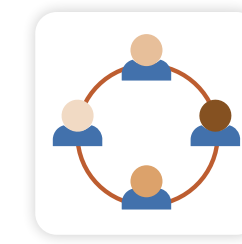

Valuable Insights: Track visitor interactions and user behavior through collection-specific analytics, such as object views, popular media, and shared pages. Use this data to refine digital strategy and improve outreach.

Featured Collection Highlights: Promote key objects or exhibitions by featuring them directly within TMS Collections or TMS for Windows. Update highlights quickly to reflect changing focus and priorities.

FLEXIBLE DISPLAY OPTIONS

Flexible Media Support: Publish and display a range of media including high-resolution images, 3D images, videos, PDFs, audio recordings, and interactive slideshows. Choose from list view, detailed single-item view, or immersive gallery-style presentations.

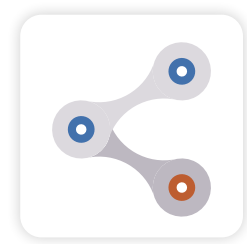

Advanced Image Treatment: Allow users to examine artwork in extraordinary detail with deep zoom functionality, making high-resolution images truly accessible and engaging.

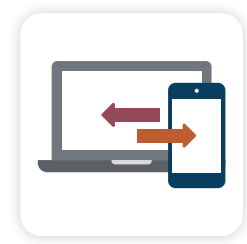

TAILORED SERVICES TO ENHANCE YOUR EXPERIENCE

Enhance your **eMuseum** experience with our tailored support services designed to meet your specific needs.

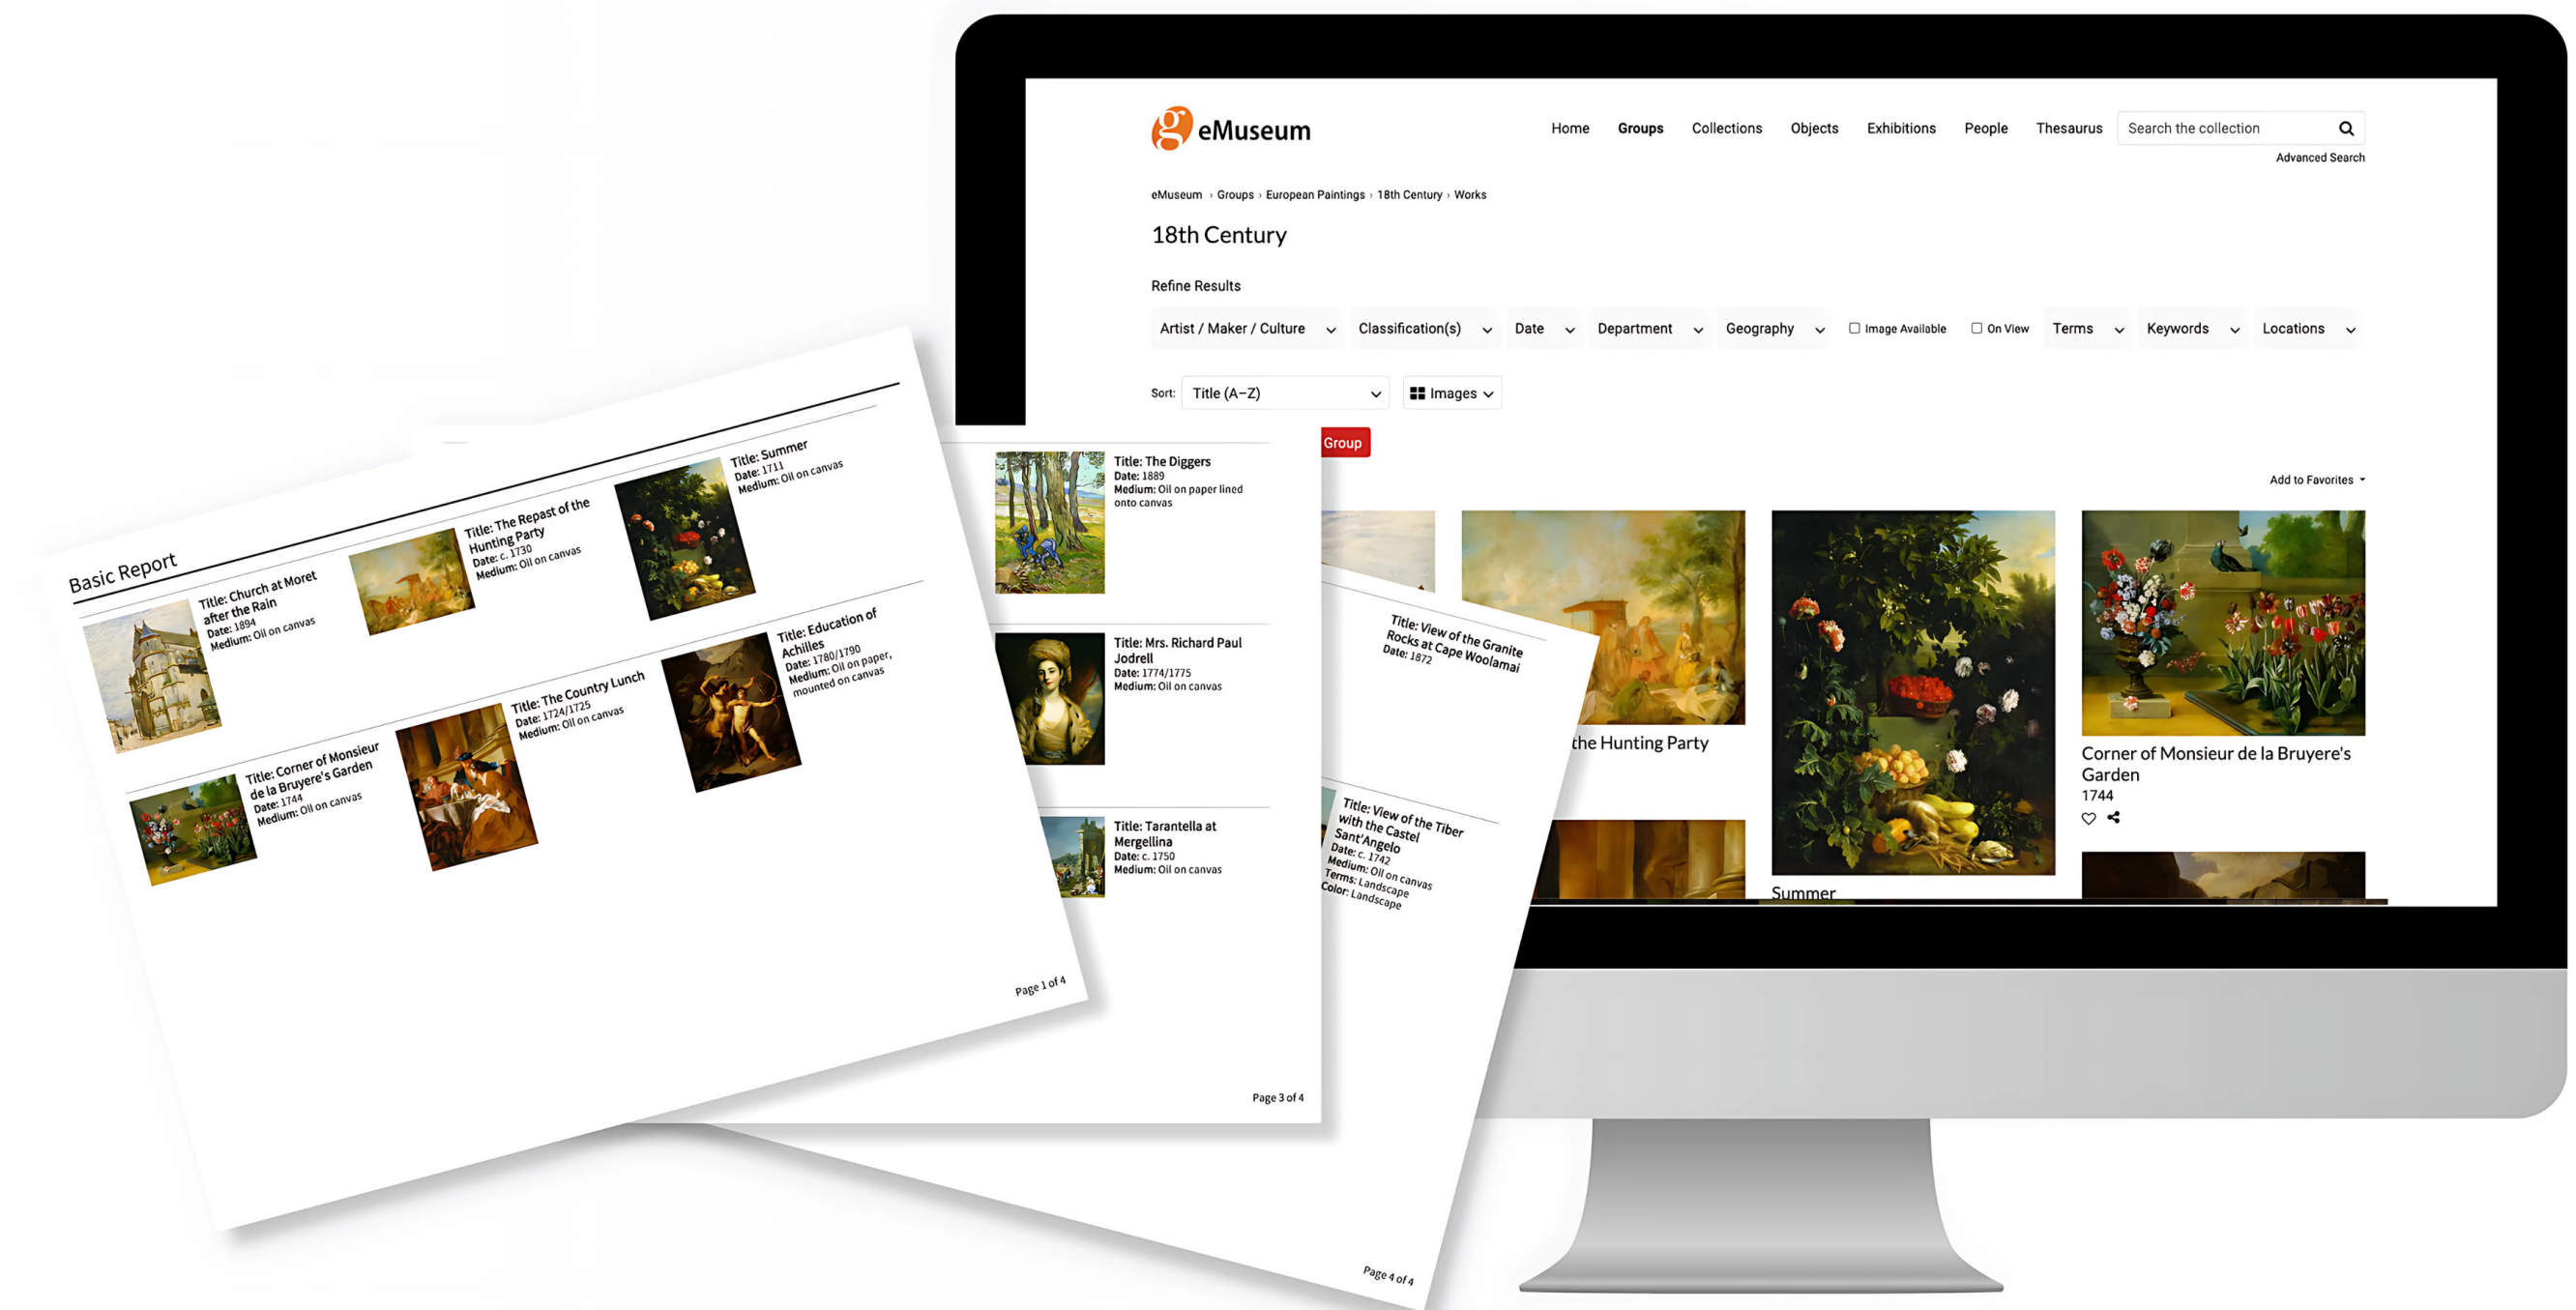

Configuration: Whether you need to configure reports, publish custom fields, or extend eMuseum's functionality, our team will collaborate with you to define goals and implement comprehensive solutions. We ensure that eMuseum aligns perfectly with your institutional needs and workflows.

Look & Feel Customization: Make your eMuseum site seamlessly match the design of your existing website. Our 5-day customization service creates a unified visual experience, ensuring that visitors can easily navigate from your main site to your online collections.

Advanced Web Design: Our in-house design team provides innovative, custom web design solutions to make your online collection stand out. We focus on ensuring your collection is visually engaging, user-friendly, and optimized for a dynamic online presence.

Explore how leading cultural institutions have leveraged eMuseum to bring their collections to life online. These examples demonstrate the power and flexibility of eMuseum, and how it can be customized to fit your museum's needs, branding, and goals.
