

TMS Suite

**YOUR ALL-IN-ONE
COLLECTIONS PLATFORM**

The TMS Suite offers a comprehensive set of **integrated tools** designed specifically for museums and cultural institutions. It combines multiple modules to streamline collection management, media handling, conservation efforts, and online engagement—everything you need in **one unified platform**. With the TMS Suite, you don't rely on third-party systems, ensuring seamless integration with a single, central database that grows with your institution's needs.

TRANSFORM HOW YOU MANAGE COLLECTIONS, MEDIA, AND DATA

Managing collections, media, and data across platforms can be complex. The TMS Suite offers an **all-in-one solution** that streamlines workflows, enhances collaboration, and grows with your institution, simplifying processes and reducing costs.

No Third-Party Systems

Avoid the complexity and risks of relying on external systems. Everything is built into the TMS Suite, reducing compatibility issues and saving you time.

No Extra APIs Required

The TMS Suite eliminates the need for additional APIs, offering a more secure and reliable solution for managing your collection.

Centralized Database

Manage all your data securely in one place, ensuring consistency and easy access across all departments.

Effortless Growth

As your institution expands or new functionality is developed, the TMS Suite can grow with you—simply add on new modules without the need to configure an entirely new system.

Streamlined Workflow

All your tools are integrated, meaning fewer manual processes and faster decision-making across departments.

Reduced Maintenance Costs

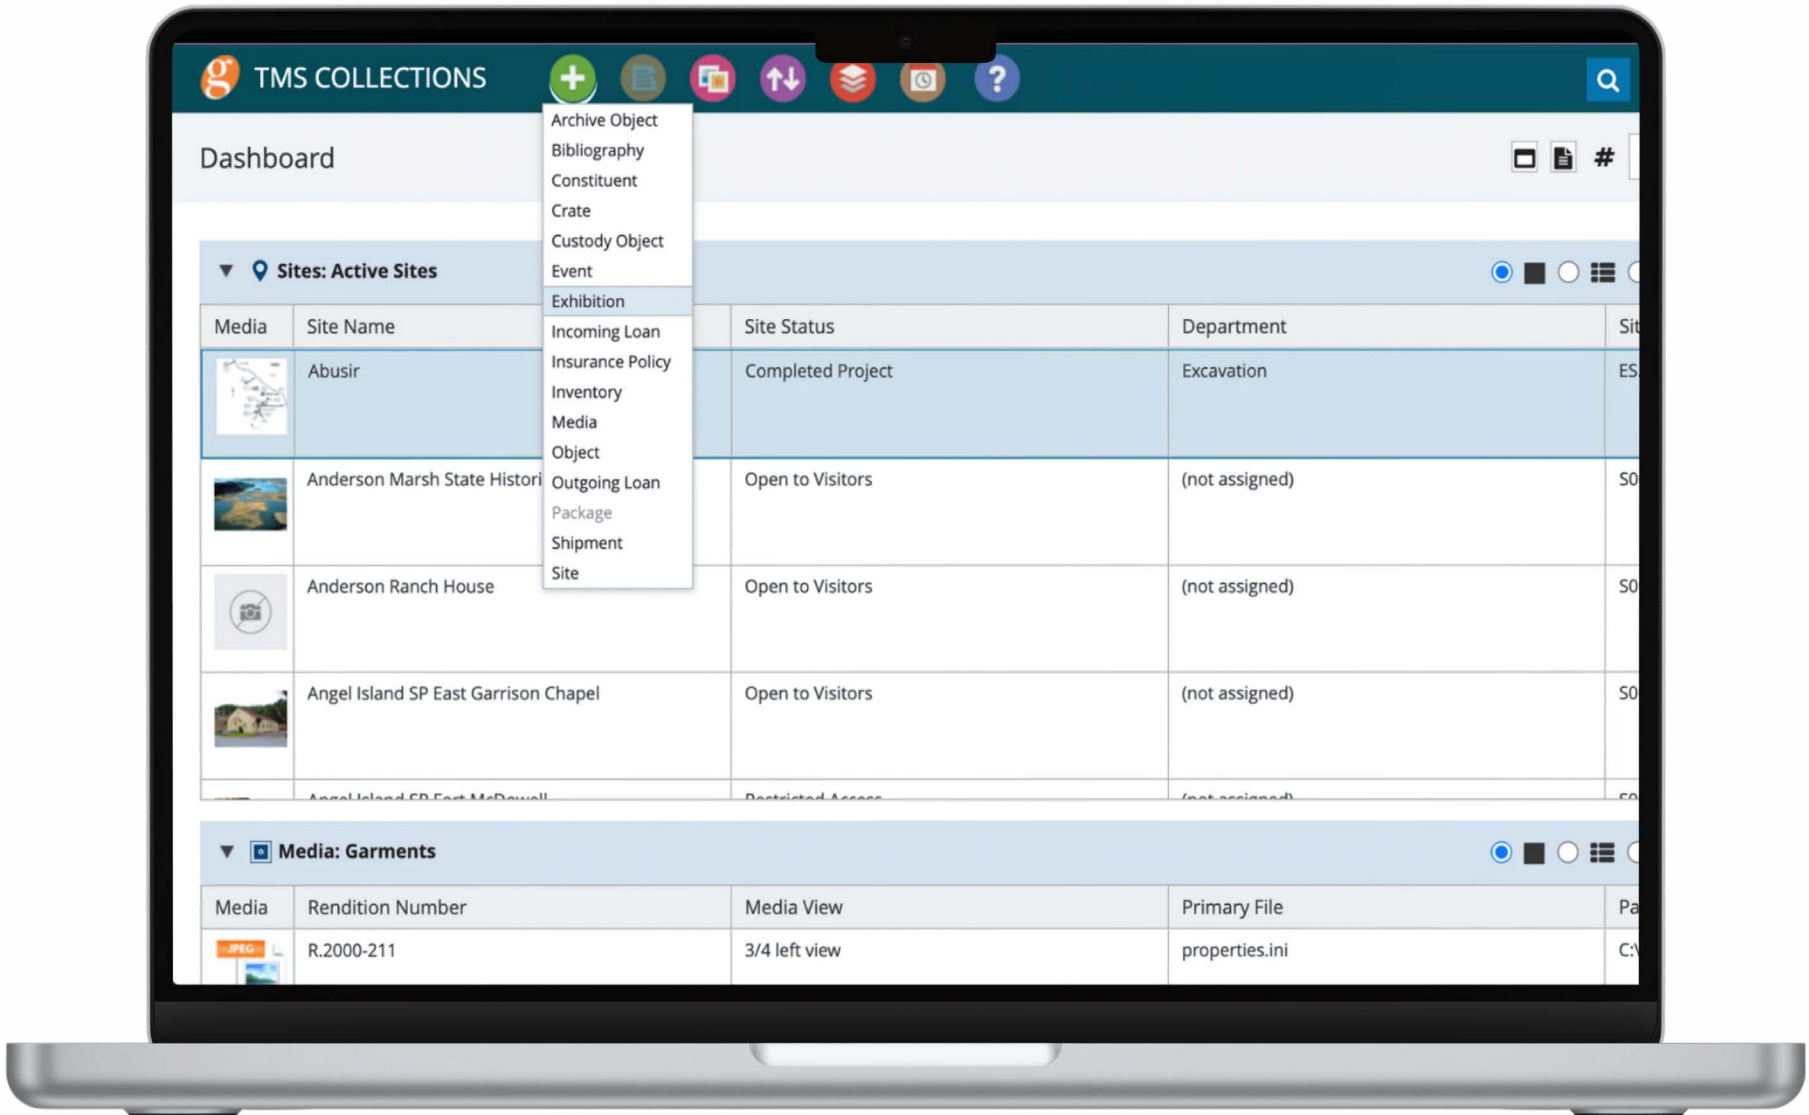

No need for ongoing management of third-party integrations, minimizing both IT workload and costs.

An integrated solution means you can keep pace with the future without disruption. As your institution grows, more tools and functionality can be seamlessly added without reconfiguring your system, ensuring long-term stability and scalability.

TMS COLLECTIONS

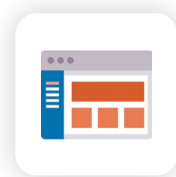

TMS Collections is a robust collection management system that empowers institutions to manage, track, and organize objects with ease. Offering customizable fields and powerful reporting tools, it provides a detailed and scalable solution to meet your institution’s specific requirements. Whether it’s acquisitions, loans, exhibitions, or condition reports, TMS Collections puts your collection at your fingertips. As your needs evolve, you can expand your TMS Suite with additional tools to further enhance your collection management capabilities.

WHY CHOOSE TMS COLLECTIONS?

Browser-Based & Flexible Deployment: Access your collections securely from anywhere. Whether hosted in the cloud or deployed on-premise, the TMS Suite eliminates the need for additional infrastructure, offering a seamless and scalable solution for institutions.

Highly Customizable & Configurable : Tailor TMS Collections to your institution’s unique workflows with powerful customization tools. Modify fields, configure processes, and manage user roles and permissions to ensure the system aligns perfectly with your operational needs.

Powerful Search Capabilities & Thesaurus Manager: Effortlessly find records with advanced search features and customizable filters. Ensure consistency across your data with an integrated thesaurus manager—a hierarchical, industry-standard terminology tool that helps maintain controlled vocabularies and supports precise, structured searches.

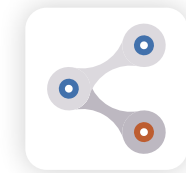

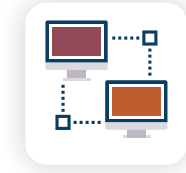

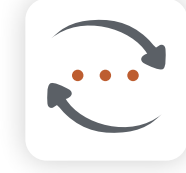

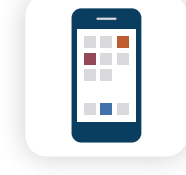

Multilingual Interface : Support your global team with TMS Collections’ multilingual interface. Fully Unicode-compliant, it supports all modern languages and special characters—including those used in indigenous and tribal languages.

TMS MEDIA STUDIO

TMS Collections is a robust collection management system that empowers institutions to manage, track, and organize objects with ease. Offering customizable fields and powerful reporting tools, it provides a detailed and scalable solution to meet your institution’s specific requirements. Whether it’s acquisitions, loans, exhibitions, or condition reports, TMS Collections puts your collection at your fingertips. As your needs evolve, you can expand your TMS Suite with additional tools to further enhance your collection management capabilities.

WHY CHOOSE TMS MEDIA STUDIO?

-  **Advanced Media Management:** Handle high-resolution and 3D images, videos, and audio files with ease, streamlining the cataloging, editing, and linking of media to collection records.
-  **Effortless Sharing and Consistency:** Share content easily with stakeholders, donors, and the public, all while maintaining high quality and consistency in your media presentation.
-  **Efficient Collaboration Tools:** Share and collaborate on media with ease, allowing teams, stakeholders, and donors to view and provide feedback on digital assets securely.
-  **No Third-Party Integration Required:** Eliminate the need for external DAM systems, saving time, money, and IT resources while minimizing maintenance and system disruptions.
-  **Mobile App Ready:** Effortlessly capture, upload, and organize images directly from your mobile device with the TMS Media Capture app—ideal for teams in galleries, storage, or the field.

TMS CONSERVATION STUDIO

Designed for conservation professionals, TMS Conservation Studio provides the tools needed to monitor, document, and manage the condition of your collection. Create detailed conservation reports, track treatments, and generate actionable insights to ensure the preservation of your objects. With built-in workflows and customizable fields, Conservation Studio helps streamline every stage of the conservation process.

WHY CHOOSE TMS CONSERVATION STUDIO?

Efficiency & Time Savings: Streamline your conservation work with time-saving features that allow you to manage projects, annotate high-resolution images, and cross-link related activities—faster and more easily.

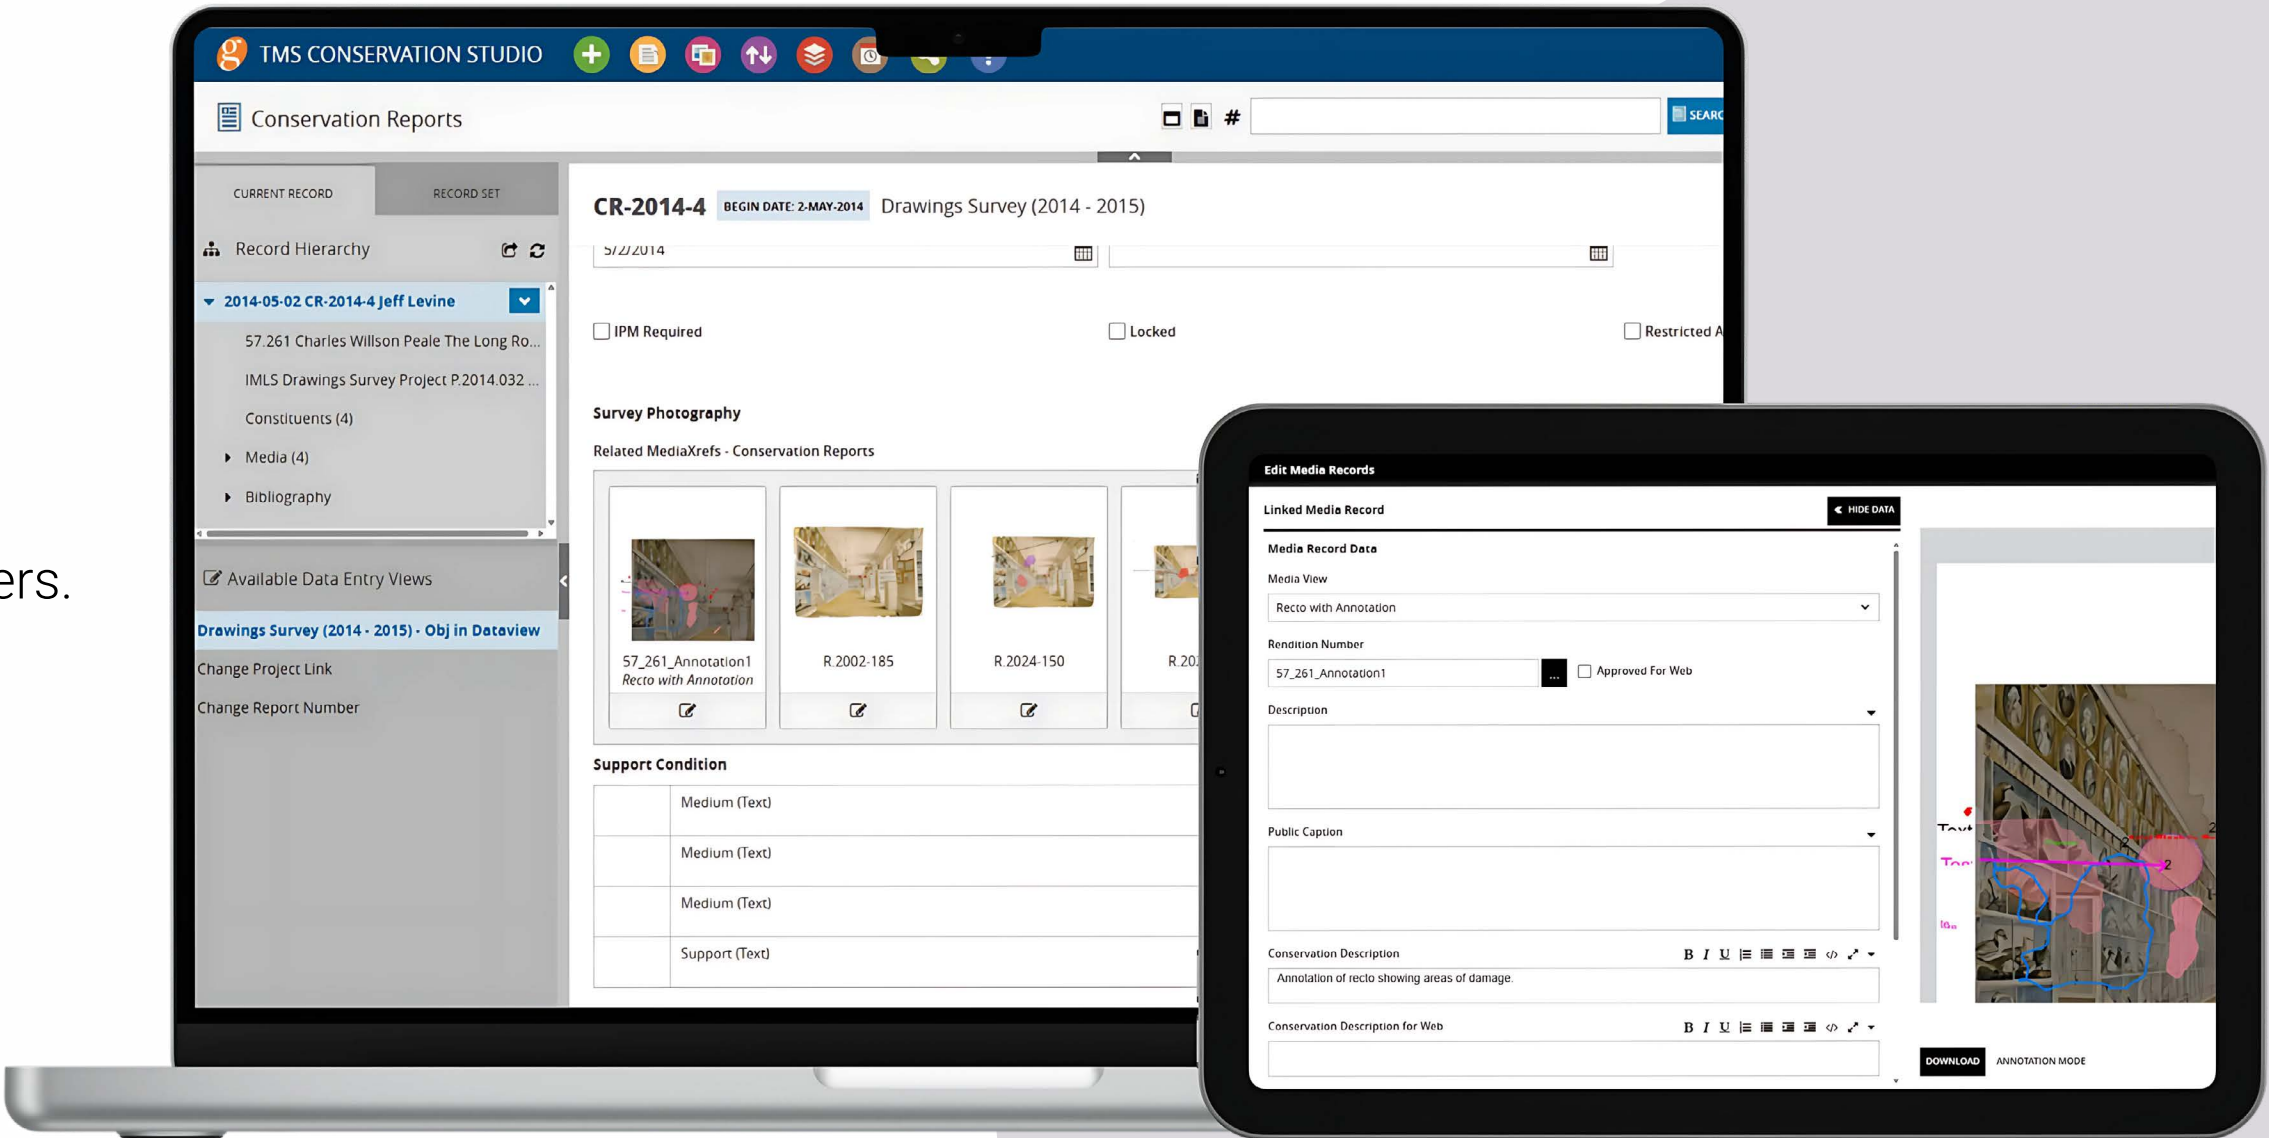

Improved Collaboration: Enhance coordination across teams by fostering seamless collaboration between conservators, curators, registrars, exhibition teams, and external partners.

Enhanced Record Quality: Maintain high-quality, detailed records for every object in your collection, ensuring accurate and comprehensive documentation for future reference.

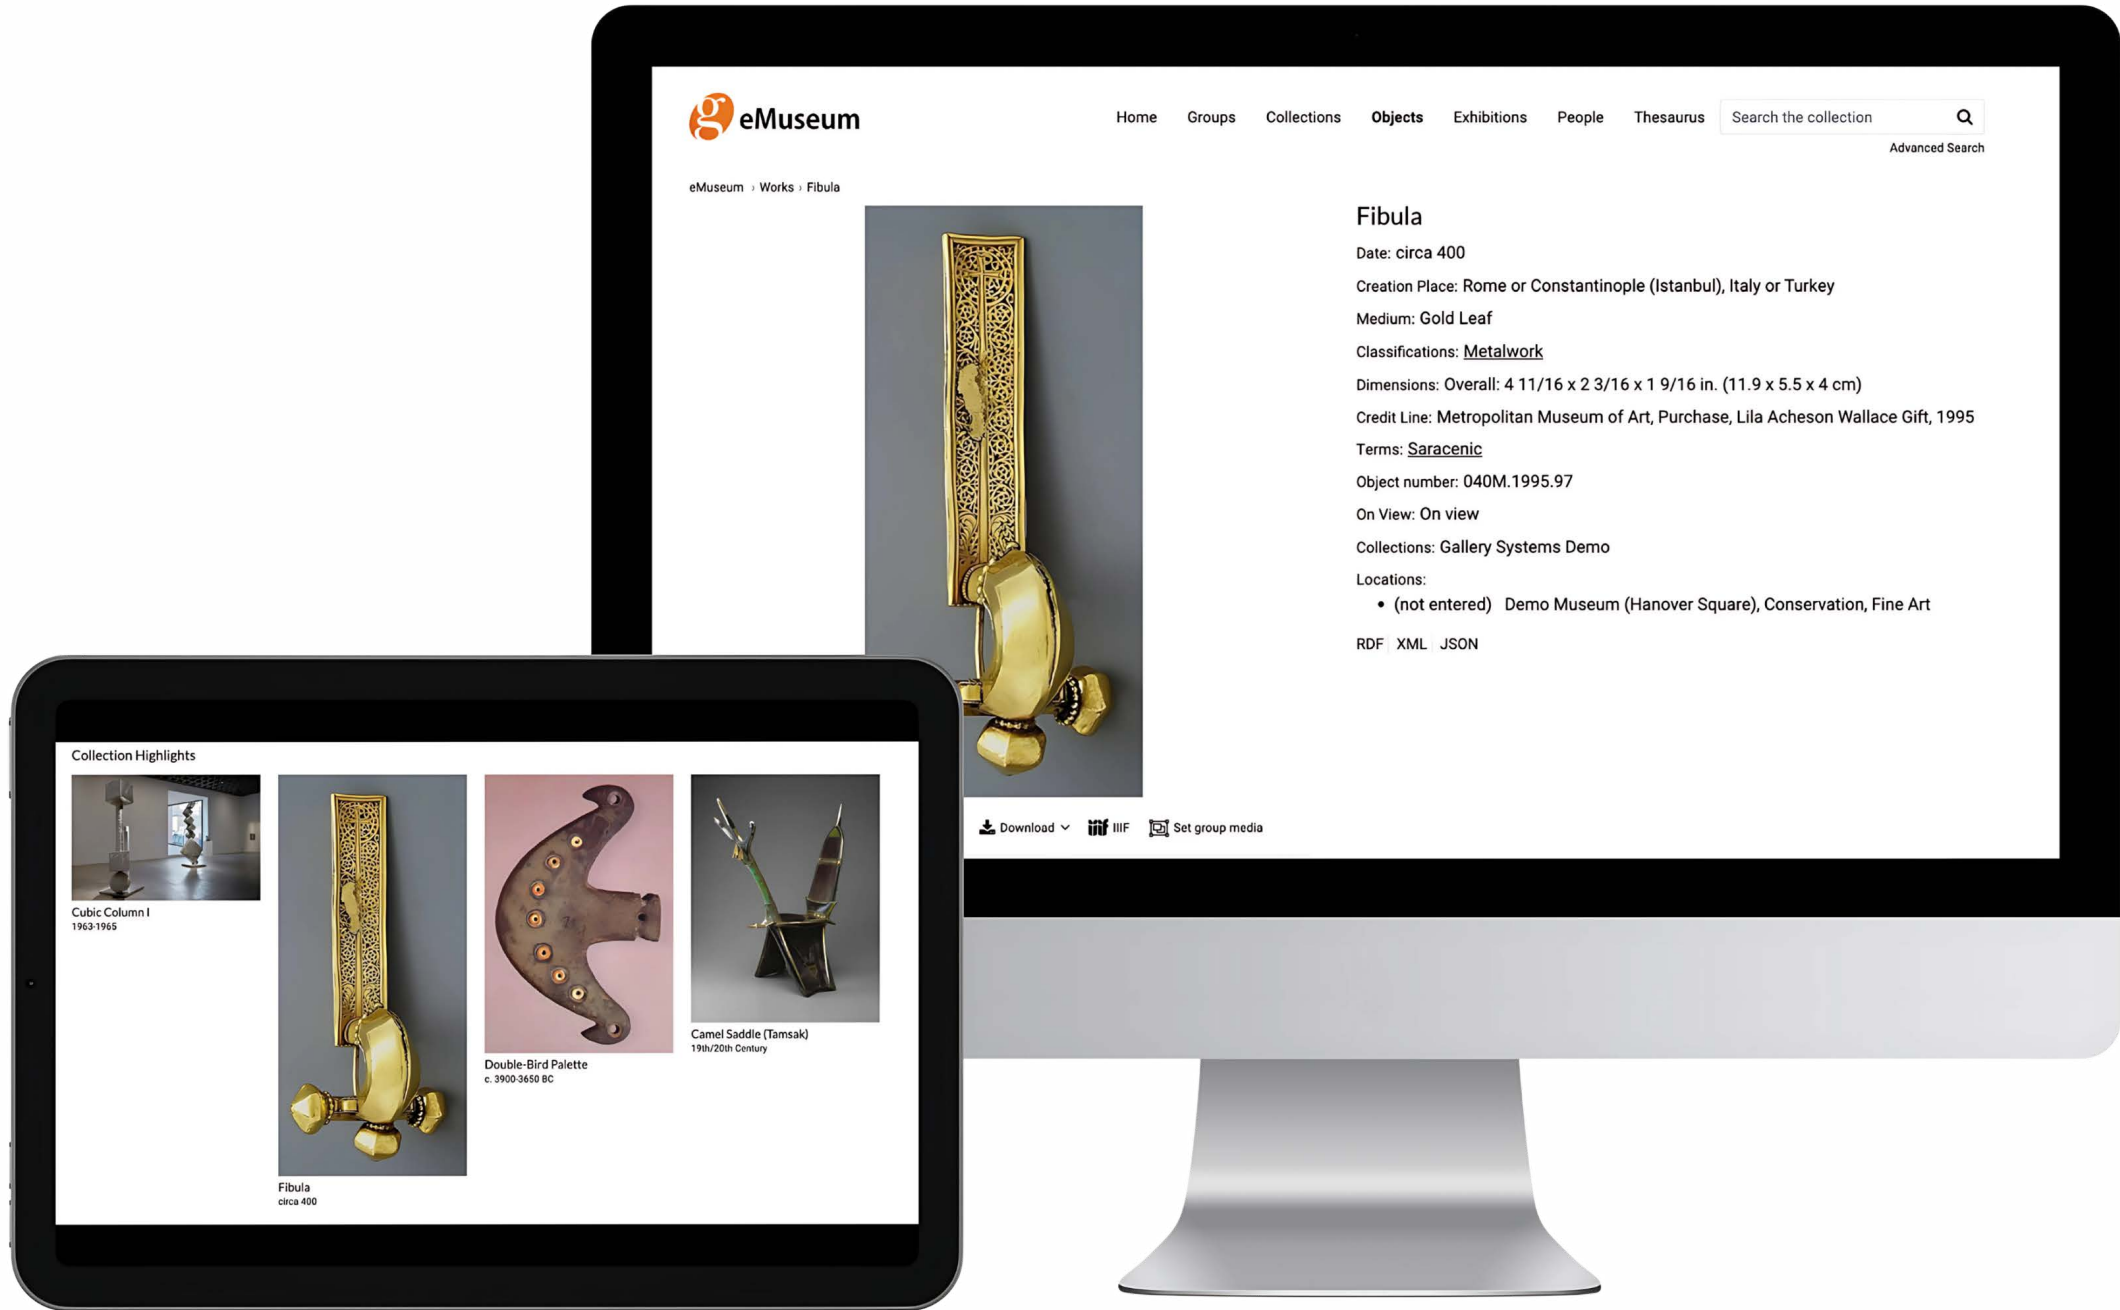

Simplified Workflows: Replace tedious, paper-based processes with streamlined digital workflows, reducing errors and freeing up valuable time for more important tasks.

EMUSEUM

eMuseum is an innovative platform for presenting your collection online. It allows you to create engaging and user-friendly digital exhibitions that provide a virtual experience for your visitors or to an internal team. Integrated with the TMS database, eMuseum ensures that your online presence is up-to-date and consistent with your physical collection records, making it easier than ever to connect with your audience globally.

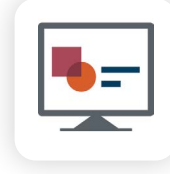

WHY CHOOSE EMUSEUM?

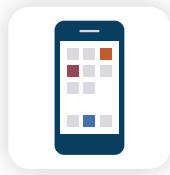

Powerful Search Capabilities: eMuseum’s advanced search functionality allows users to easily find objects, exhibitions, or records with precise filters and customized metadata.

Fully Customizable Experience: Tailor every aspect of your online collection, from the design and layout to how you present your objects, to match your institution’s branding and goals. .

Interactive and Engaging Media Formats: Engage your audience like never before with rich media support, including images, videos, 3D models, and more, creating a dynamic and immersive experience.

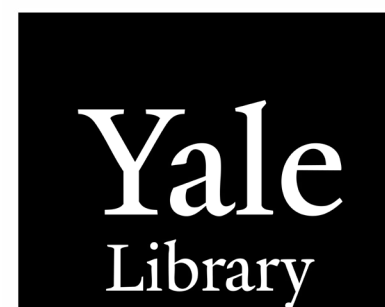

Mobile-Ready: Whether on a smartphone, tablet, or desktop, eMuseum ensures your collection is accessible and responsive across all devices.
